Arguing that the ultimate resource is the human imagination coupled to the human spirit, Julian Simon has led a vigorous challenge to conventional beliefs about scarcity of energy and natural resources, pollution of the environment, the effects of immigration, and the "perils of overpopulation." The comprehensive data, careful quantitative research, and economic logic contained in the first edition of *The Ultimate Resource* rebutted widely held professional judgments about the threat of overpopulation. In Simon's view, the key factor in natural and world economic growth is our capacity for the creation of new ideas and contributions to knowledge. The more people alive who can be trained to help solve the problems that confront us, the faster we can remove obstacles, and the greater the economic inheritance we shall bequeath to our descendants. In conjunction with the size of the educated population, the key constraint on human progress is the nature of the economic-political system: Talented people need economic freedom and security to bring their talents to fruition.

"Whether you are preparing to become an ACE-certified Personal Trainer, Group Fitness Instructor, or Lifestyle & Weight Management Coach, this textbook provides the foundational knowledge you will need before moving on to study the materials specific to your chosen certification. ... Each of the five chapters includes a study guide"--P. [4] of cover.

ACSM's *Resources for the Personal Trainer* provides a broad introduction to the field of personal training, covering both basic science topics and practical application. It was originally designed to help people prepare for the ACSM Personal Training Certification Exam. It continues to serve that function, but the market for it has expanded to practitioners in the field looking for an additional resource, as well as in an academic setting where the book is a core text for personal training programs.
