A few words about the series "Scientific Fundamentals of Robotics" should be said on the occasion of publication of the present monograph. This six-volume series has been conceived so as to allow the readers to master a contemporary approach to the construction and synthesis of control for manipulation robots. The authors' idea was to show how to use correct mathematical models of the dynamics of active spatial mechanisms for dynamic analysis of robotic systems, optimal design of their mechanical parts based on the accepted criteria and imposed constraints, optimal choice of actuators, synthesis of dynamic control algorithms and their microcomputer implementation. In authors' opinion this idea has been relatively successfully realized within the six-volume monographic series. Let us remind the readers of the books of this series. Volumes 1 and 2 are devoted to the dynamics and control algorithms of manipulation robots, respectively. They form the first part of the series which has a certain topic-related autonomy in the domain of the construction and application of the mathematical models of robotic mechanisms' dynamics.

Fast Accurate Bids is the smart choice for both large and small commercial printers, in-house screen printers, embroiderers, and other apparel decorators. This easy-to-use Windows PC software program generates customer quotes quickly, accurately, and consistently. It also lets apparel decorators get a better understanding of their costs and pricing. The Fast Accurate Bids User's Manual describes how to create customer bids. It provides detailed information on how to approach the bid process and gives lists of things to note when using the various features the software provides.

Fast Accurate Bids for Embroidery is the smart choice for both large and small commercial embroiderers, and other apparel decorators. This easy-to-use Windows PC software program generates customer quotes quickly, accurately, and consistently. It also lets embroiderers get a better understanding of their costs and pricing. The Fast Accurate Bids for Embroidery User's Manual describes how to create customer bids. It provides detailed information on how to approach the bid process and gives lists of things to note when using the various features the software provides.
