The legendary civilisation of Atlantis is a topic that can evoke feelings of awe and mystery. Past life therapist, Paul Williamson, has investigated experiences of people's lives on Atlantis using regression, and now firmly believes that Atlantis did exist. Through careful research, and by using the shared soul memory of four people, Paul and Linda have compiled a fascinating account of the history of Atlantis from the times of the first settlements through to its destruction. Included are detailed living transcripts of regression sessions and channelled teachings. These experiences detail aspects of the healing and psychic power, and various forms of corruption in which people from Atlantis became involved. There are sharings of the psychological learning and scars that were left upon souls who became obsessed with power. From the tragedies and mistakes of these times, for the many millions who lived then, there may be lessons that can be learned. For those who have hidden within them, soul memories of having lived on Atlantis, this book may stimulate a recollection of those long lost times.

Africa: a forgotten continent that evades all attempts at control and transcends reason. Or does it? This book describes Europe's image of Africa and relates how the conception of the Dark Continent has been fabricated in European culture--with the Congo as an analytical focal point. It also demonstrates that the myth was more than a creation of colonial propaganda; the Congo reform movement--the first international human rights movement--spread horror stories that still have repercussions today. The book cross-examines a number of witness testimonies, reports and novels, from Stanley's travelogues and Conrad's Heart of Darkness to Herge's Tintin and Burroughs' Tarzan, as well as recent Danish and international Congo literature. The Dark Continent? proposes that the West's attitudes to Africa regarding free trade, emergency aid and intervention are founded on the literary historical assumptions of stories and narrative forms that have evolved since 1870.

This collection of essays from a distinguished, international group of scholars offers a portrait of W. H. Auden's creativity. The essayists look in fresh ways at Auden's composition process and artistic virtuosity, and at the astonishing breadth of his interests and activities. Critics have long acknowledged Auden's 'second thoughts' with regard to religion and politics, yet few have considered how essential rethinking and revision were to his writing process. His notebooks and drafts served as a fascinating, multifaceted laboratory for his literary experiments; and even after his writing was published, Auden never stopped revising it. The essays collected here explore cross-pollination in the genesis of his works: how theater collaboration, film work, traveling, teaching, reviewing, and wartime activities shaped his literary oeuvre. They uncover neglected episodes that affected his artistic choices, and overlooked archives full of surprising revelations about his writing practice. The essays also explore manuscript evidence that shows the formal experimentation of one of the great versifiers of modern poetry.

The mysterious civilizations of Lemuria and Atlantis become reality as Shirley Andrews, the author of *Atlantis: Insights From a Lost Civilization* combines details from scholars, scientists and the respected psychic Edgar Cayce.
