A South Florida man arrested on allegations of rape at New York City's Central Park was on probation for an eerily similar attack in Sunny Isles Beach in 2020.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States—which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean—it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts—it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7—it is nevertheless an essential record of one of the most transformational events of modern times.

The Military Balance 2013 is the annual assessment of the military capabilities and defence economics of 171 countries world-wide. New features of the 2013 edition include; reorganised and expanded analytical essays. New sections on trends in contemporary armed conflicts in Afghanistan and Syria, as well as trends in defence capability areas, with a focus on equipment, technological or doctrinal developments. There is also an essay on trends in defence economics and procurement, one on European defence industries, and another on anti-access/area denial, detailed analysis of regional and national defence policy and economic issues for selected states, updated graphics feature on comparative defence statistics, with focus on defence economics, and major land, sea and, air capability concerns, tables, graphics and analysis of defence economics issues, additional national capability summaries, additional data on, land forces: combat support and combat service support, new graphics and maps on defence capability issues and additional data on cyber capabilities.

The Military Balance is the International Institute for Strategic Studies annual assessment of the military capabilities and defense economics of 170 countries worldwide. It is a useful resource for those involved in security policy making, analysis and research. The book is a region-by-region analysis of the major military and economic developments.

The United States faces hard choices in dealing with a war that has spread from Afghanistan into Pakistan. Any effective counterinsurgency strategy in Afghanistan must rely on building up strong Afghan security forces at the local level and using them to defeat the enemy and create the security requisite for governance and development. This up-to-date analysis describes in detail the continued development of the Afghan National Security Forces (ANSF): the historic challenges—and missed opportunities—they have faced; their strengths and weaknesses; and the prospects for future force development. The report examines the progress ANSF forces are making in the broader context of the ideological, civil, military, and economic conflict that affects both Afghanistan and Pakistan, and it explains how the lack of troops and effective local training programs have made it possible for the Taliban, Hekmatyer, and Haqqani networks to gain strength and expand their capabilities. Both the Afghan National Army (ANA) and the Afghan National Police (ANP) must improve dramatically in size and capability before they can take the lead in Afghan security. The report details what improvements in force size and quality are realistic in the near term as well as what challenges stand in the way of the proposed near-doubling of the size of the ANSF. The logistical, financial, and training challenges of making ANA units capable of operating independently receive particular emphasis. The United States, say the authors, is the only country with the resources to change this situation. It has failed to do so, however, by not providing the money, mentors, and training personnel or the kind of partners in the field necessary to create the scale and quality of Afghan forces needed. If the Obama administration does not act quickly and decisively to reverse the situation, Afghanistan, NATO/ISAF, and the United States may well lose this war.

The attack on Mumbai shocked the world. For three days terrorists wreaked havoc over multiple venues in India's commercial capital, leaving a trail of blood, death and destruction. Reporters from Hindustan Times tracked the events as they unfolded at Cama Hospital, the Chatrapati Shivaji Terminus and followed the three-day siege at the Taj and Trident

Hotels and at Nariman House. The collection brings together their dispatches as well as commentaries, profiles and columns published during the siege and its aftermath. This is a dramatic snapshot of the victims, heroes and perpetrators of the attacks and also of the outrage that still grips the nation.

This book provides a concise historical survey of the various types of aircraft used by the United States Army Air Corps, Army Air Forces, and Air Force, and the Navy and Marine Corps to accomplish air attack missions since 1926. The text covers four types of fixed-wing aircraft: designated attack aircraft; light, medium, and tactical bombers; fighter-bombers; and adapted attack aircraft. Reports on individual aircraft types include the aircraft's original military requirements, production history, and operational record, usually accompanied by photographs, illustrations, and technical specifications. Four appendices detail aircraft designations and nomenclature used throughout the military, the organizational structure of various military air units, aircraft designs that never made it into official service, and the evolution of attack aircraft weapons and tactics.

CLASH OF THE ELDIANS The deadly pageant directed by and starring Willy Tybur clearly illustrates the threat posed by the island of Paradis, as the dangerous rebel Eren Yeager mows down civilians and deals a massive blow to the Marleyan army. Meanwhile, the Eldian soldiers including Mikasa, Connie, and Sasha sow chaos in the city and disrupt military communications. But the battle between Eren and the War Hammer Titan isn't over, and it's about to draw in the full might of this land's warriors...

Davis's detailed account demonstrates that Libya was not an arbitrarily selected target but rather a justified one. He examines the context in which the April 15, 1986, U.S. military attack against Libya occurred. The history of U.S.-Libyan relations from the Nixon to the Reagan administration is covered in detail including the Rome and Vienna massacres and Operation Prairie Fire. A description of the final days leading to the attack include the La Belle Discotheque bombing, the U.S. decision to attack, preparations, the military operation itself, and its aftermath.
