On a small assembly line in Neckarsulm, Germany, no more than twenty exotic Audi R8 sports cars are built daily. The entire process is overseen by small teams of specialists that oversee every step of production. Every single part is inspected carefully, and nothing goes unchecked. It is a level of hand-built quality one might expect to find in a Ferrari Enzo or the Vector W8A of the 1980s, but almost unheard of from a manufacturer the size of Audi AG. The Turbo Quattro Coupe (or Urquattro) of the early 1980s was largely assembled by hand much in the same way, but Audi has refined the process for the R8 and has introduced one of the most spectacular sports cars ever. I hope this book will provide a better insight into the design, development, and production of this magnificent automobile.

Audi produces a broad range of vehicles and is known for creating cars that are both reliable and fast. Readers will be fascinated by the details that make these cars great. Color photographs show Audis in action and give readers an exiting glimpse of these high-performance cars. Each model profiled has its own stat-at-a-glance table.

The new Audi R8 2018 is a beautifully crafted modern sports car that is as easy to drive as it is to live with. It boasts a powerful engine that offers amazing performance and has been ranked in the top 5 Luxury Sports Cars of 2018. The only negatives for this premium sports car is the poor fuel economy and the narrow racing seats that are offered. The Audi R8 has a reasonable starting price compared to other competitors with similar features. However, with additional customisations, the price is expected to increase significantly. When compared to its competitors Lamborghini, Ferrari and Mercedes Benz, the R8 2018 is built ideally for speed rather than primarily luxury.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation)Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway)Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive EngineersGM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade agoYou can save \$2,000 by cutting freight fees and "administrative" chargesDiesel annual urea fees and "canconst you \$300, including an \$80 "handling" charge for \$25 worth of ureaLemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki
