Although we don't often think about it, the bacteria that live within us help digest our foods, protect us from disease, and improve immune functions. Without bacteria, we would not survive very long. Unfortunately, many of us suffer from illnesses related to an imbalance of these gastrointestinal bacteria- illnesses caused by too many aggressive bacteria and too few defensive, "healthy" ones. Allergies, eczema, vaginal and urinary tract infections,

A probiotic is any product that contains enough live microorganisms to bring about beneficial health effects. Essentially, probiotics are healthy bacteria- healthy bacteria that are easily ingested and help to restore the balance inside our digestive system.
