Simplexity, as I understand it, is the range of solutions living organisms have found, despite the complexity of natural processes, to enable the brain to prepare an action and plan for the consequences of it. These solutions are simplifying principles that enable the processing of information or situations, by taking into account past experience and anticipating the future.

The problematic of biopolitics has become increasingly important in the social sciences. Inaugurated by Michel Foucault's genealogical research on the governance of sexuality, crime and mental illness in modern Europe, the research on biopolitics has developed into a broader interdisciplinary orientation, addressing the rationalities of power over living beings in diverse spatial and temporal contexts. The development of the research on biopolitics in recent years has been characterized by two tendencies: the increasingly sophisticated

theoretical engagement with the idea of power over and the government of life that both elaborated and challenged the Foucauldian canon (e.g. the work of Giorgio Agamben, Antonio Negri, Roberto Esposito and Paolo Virno) and the detailed and empirically rich investigation of the concrete aspects of the government of life in contemporary societies. Unfortunately, the two tendencies have often developed in isolation from each other, resulting in the presence of at least two debates on biopolitics: the historico-philosophical and the empirical one. This Handbook brings these two debates together, combining theoretical sophistication and empirical rigour. The volume is divided into five sections. While the first two deal with the history of the concept and contemporary theoretical debates on it, the remaining three comprise the prime sites of contemporary interdisciplinary research

unwitting public. After years of soundbites about connecting people, the social media giants are only just beginning to admit to the scale of the problem. We stand on the precipice of an era where switching your mobile platform will have more impact on your life than switching your government. Where freedom and privacy are seen as incompatible with social well-being and transparency. Where your attention is sold to the highest bidder. Our laws don't cover what is happening and our politicians don't understand it. But if we don't fight to change the system now, we may not get another chance.
