This book examines the commemoration of 9/11 in American memorial culture. It argues that the emergence of counter-memories of September 11 has been compromised by the dominance of certain narrative paradigms – or, frames of memory – that have mediated the representation of the attacks across cultural,

juridical discourses.

Although Roland
Barthes and Michel
Foucault announced the
death of the author
several decades ago,
critics have been slow to
abandon the idea of the
solitary writer. Bette

this notion has blinded

writing is seldom an individual activity and that it has led us to overlook both the frequency with which women authors have worked together and the significance of their collaborative undertakings as a form of professional activity. In *Writing Double*, the first full-length treatment of women's

Which of these forms have particularly attracted women? Such questions are central to London's analysis of the challenge that women's

This book offers a new
reading of early modern
romance in the light of
historically

specifically the medical
tradition of love-
melancholy. The book

understanding the
characteristic patterns of
romance: narrative

Unlike many recent

Tasso's Gerusalemme

The Faerie Queene,
concluding with a brief
consideration of the
significance of this
