The Journal of Business Ethics was founded by Alex C. Michalos and Deborah C. Poff and published its first issue in March 1982. It is the most frequently cited business ethics journal in the world. The Journal has always offered a multi-disciplinary and international public forum for the discussion of issues concerning the interaction of successful business and moral virtue. Its authors and readers are primarily scholars and students in social sciences and philosophy, with special interests in the interaction of these disciplines with business or corporate responsibility. Since the field of business ethics grew simultaneously with the growth of the Journal, a collection of its most cited articles is tantamount to a collection of the articles that had the greatest influence in defining the field over its first 30 years of development. In this anniversary volume, an overview of citation classics from the Journal is presented, the 33 most frequently cited articles are reproduced and brief reflections on the impact of the Journal on the field are given from over 100 scholars who authored citation classics and/or distinguished papers, as well as those who served on the Editorial Board and/or are recognized as leaders in the field.

In August 1976 the research seminar 'Decision-making in business' was organized at Nijenrode, The Netherlands School of Business. More than fifty scientists and practitioners from nine countries presented research papers in one of the six discussion groups. Some of them also presented some of their ideas in front of a large mixed audience at a one-day symposium. Many of the papers presented at Nijenrode were of such a high quality that the decision to publish a selection of them was an easy one. At the same time the new series Nijenrode studies in business was initiated. All who were involved, the policy committee 'Of the Nijenrode studies, the advisory and editorial board of the series, the publisher, and the organizing committee of the seminar and symposium, acclaimed the idea of publishing three volumes in the new series. A collection of eleven papers could be grouped under the title Trends in managerial and financial accounting, and has been published as volume 1 of this series. A collection of fourteen papers has been published as the second volume under the title Trends in financial decision making, while this volume, consisting of twelve papers (and an introduction) explores the theme Trends in business ethics. The introduction by Stanley L. Jakiwas written for the symposium. It suggests why the papers of Pjotr Hesselings, Antoine Kreykamp, and Richard H. Viola, which were not presented at Nijenrode, are introduced here.
