Conversations About Group Concept Mapping: Applications, Examples, and Enhancements takes a concise, practice-based approach to group concept mapping. After defining the method, demonstrating how to design a project, and providing guidelines to analyze the results, this book then dives into real research exemplars. Conversations with the researchers are based on in depth interviews that connected method, practice and results. The conversations are from a wide variety of research settings, that include mapping the needs of at-risk African American youth, creating dialogue within a local business community, considering learning needs in the 21st century, and identifying the best ways to support teens receiving Supplemental Social Security Income. The authors reflect on the commonalities between the cases and draw out insights into the overall group concept mapping method from each case.

Through a varied personal life and professional career, in which he developed a creative psychotherapeutic approach that allows the adaptation of diverse roles with clients, Dr. Miller has gained insights through working in academia, the sciences, management consulting, and a state hospital. He applies these insights, along with those he gained working various summer jobs, to take readers beyond the standard medical model of diagnosis and treatment by drawing on the roles of other professionals. He examines 11 different occupations and explores how the insights gained in each field can enhance therapeutic possibilities. How does cooking relate to psychotherapy? Can accounting change the way psychotherapy is performed? Read on to find out!
