Connecticut, où Catherine Michell, une femme au foyer comme il en existe tant d'autres, se découvre une libido tonitruante... Fini les soap à la télé et les réu' Tupperware©, les journées de Cathy sont désormais ponctuées par des ateliers de minous à brouter et de troufignons défoncés.

REACHING NEW HEIGHTS ON SOLO FLIGHTS!!!

Sometimes a busy, mature housewife just needs a little alone time, y'know? Some time to get in touch with herself... to recharge her batteries. Which sometimes means draining a few batteries. And a little baby oil. Or the garden hose. There might be a spatula involved. Possibly a banana. And what's Mom doing with her teenage daughter's class photo? From the kitchen to the laundry room, in the backyard and in the bedroom, and even at the store, these intimate personal moments are captured in loving detail in this gallery of sensuously shaded pencil drawings by Rebecca, who obviously knows a thing or two (or seven hundred) about XXX-rated suburban sexuality.

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?* The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently)

mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

What if you could live again and again, until you got it right? On a cold and snowy night in 1910, Ursula Todd is born to an English banker and his wife. She dies before she can draw her first breath. On that same cold and snowy night, Ursula Todd is born, lets out a lusty wail, and embarks upon a life that will be, to say the least, unusual. For as she grows, she also dies, repeatedly, in a variety of ways, while the young century marches on towards its second cataclysmic world war. Does Ursula's apparently infinite number of lives give her the power to save the world from its inevitable destiny? And if she can -- will she? Darkly comic, startlingly poignant, and utterly original -- this is Kate Atkinson at her absolute best.

NSFW- Not Suitable For Work or No Sexual Favors Withheld? Or both? Readers can be the judge of that in this brand-new 48 page LOL romp from the provocative pencil of everyone's BFF, Rebecca. The playful pickles these teenage FWB's find themselves in will leave anyone who picks this up exhausted and hungry for more - most definitely NSFW!

When Lefebvre's book first appeared in the 1960s it

was considered a manifesto for a social movement that focused on the quality of life experienced by the individual--by the common man and woman. His emphasis on the quality of life will have even more appeal to those currently living with the problems of inflation, unemployment, and dwindling natural resources. Basing his discussions on everyday life in France, Lefebvre shows the degree to which our lived-in world and our sense of it are shaped by decisions about which we know little and in which we do not participate. He evaluates the achievements and shortcomings of applying various philosophical perspectives such as Marxism and Structuralism to daily life, studies the impact of consumerism on society, and looks at effects on society of linguistic phenomena and various kinds of terrorism communicated through mass media. In his new introduction to this edition, Philip Wander evaluates Lefebvre's ideas by relating many of them to current contexts. He discusses the political and economic aspects of daily life in the 1980s, the work environment, communications, and the world of science and technology.

Austen, Kaplan contends, participated actively in a women's culture that promoted female authority and achievement—a culture that not only helped her become a novelist but influenced her fiction.

with contributions by leading scientists: TAH, heart transplantation, biomaterials, VAS, clinical application, pathophysiology, engineering, new approaches, and special sessions. Of special note is the inclusion, for the first time, of pathophysiology related to clinical use of assist devices. The clinical application section includes a paper by Dr. Michael DeBakey on the progress made in recent years. With descriptions of the scientific exhibition, accompanied by photographs of all artificial heart devices and systems displayed by major laboratories and manufacturers, Artificial Heart 6 presents the latest information on developments in the field of artificial heart, biomaterials, and heart transplantation.

This book, by Alan A. Tait, is an examination of VAT. It looks at problems and theoretical options and potential impacts, as well as detailing the practical aspects of implementing new tax structures. The author advances arguments for and against alternative policies and illustrates his study with international examples from Europe, Latin America, Asia, and the Pacific. He suggests that countries can learn from each other's experiences with VAT.
