The E-11 carbine was the carbine version of the popular E-11 blaster rifle. It was popular among Alliance soldiers, and also

utilized by Imperial recruit trainees. It was more lightweight than E-11 blaster rifle with a higher rate of fire, but it also had less range and stopping power. The Mark I version was in use since the early years of the Galactic Empire, though was later rendered obsolete by the new Mark II. [source?]

E-10+ is listed in the World's largest and most authoritative dictionary database of abbreviations and acronyms E-10+ - What does E-10+ stand for? The Free Dictionary

Guide to contents of a collection of United States Joint Publications Research Service translations in the social sciences emanating from Communist China.

This book provides detailed calculated values for the thermal radiative and thermodynamic functions of black-body radiation in finite spectral ranges. The results are presented in tabular form. The areas of thermal power generation, infrared medical diagnostics, solar power and nuclear generation, and astrophysics are included. A range of the thermal radiative and thermodynamic functions are calculated by the authors in the finite frequency/wavenumber/wavelength intervals at different temperatures. This book also contains the tables of the chromaticity coordinates and RGB parameters calculated for different

color spaces (Rec.709 (HDTV), sRGB, Adobe RGB). A number of the optimization problems is formulated and solved for various thermal black-body radiative and thermodynamic functions in a finite range of frequencies.
