The classic work that revolutionized the way business is conducted across cultures around the world.

Written and beautifully illustrated, this is the perfect art instruction guide to pencil and ink drawing. It explores materials and tools, different ways of handling strokes and lines, techniques for establishing and conveying tones and shadows, and technical tips. Other useful features include 28 step-by-step demonstrations, numerous lessons, and 474 black-and-white and 73 color illustrations.

The aim of the book is to present the emerging environmental issues in organization and management of complex supply chains. The book includes set of solutions which show different stakeholders' viewpoints on sustainability. The scope of book takes into consideration how the emerging environmental regulation might be transformed into business practices. Therefore, the authors present the innovative approach to eco-friendly organization and coordination of logistics processes and supply chain configuration. A broad scope of practical solutions from different countries and industries is provided

Development policies in the globalising world.

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Historically, few topics have proven to be so controversial in international intellectual property as the protection of geographical indications (GIs). The adoption of TRIPS in 1994 did not resolve disagreements, and countries worldwide continue to quarrel today as to the nature, the scope, and the enforcement of GI protection nationally and internationally. Thus far, however, there is little literature addressing GI protection from the point of view of the Asia-Pacific region, even though countries in this region have actively discussed the topic and in several instances have promoted GIs as a mechanism to foster local development and safeguard local culture. This book, edited by renowned intellectual property scholars, fills the void in the current literature and offers a variety of contributions focusing on the framework

and effects of GI protection in the Asia-Pacific region. The book is available as Open Access.

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.

This book reports the state of the art of energy-efficient electrical motor driven system technologies, which can be used now and in the near future to achieve significant and cost-effective energy savings. It includes the recent developments in advanced electrical motor end-use devices (pumps, fans and compressors) by some of the largest manufacturers. Policies and programs to promote the large scale penetration of energy-efficient technologies and the market transformation are featured in the book, describing the experiences carried out in different parts of the world. This extensive coverage includes contributions from relevant institutions in the Europe, North America, Latin America, Africa, Asia, Australia and New Zealand.
