"In my years of practice as a physician, I have, by the use of Astrology, been able to very quickly locate the seat of the disease, the cause of the trouble, the time when the patient began to feel uncomfortable, as based on the birth data of the patient, and this without even touching or examining the patient, and my intense desire to get this knowledge and wisdom before students and Healers in a classified form, is the reason for this Encyclopaedia. . . .  
When once you have discovered the cause

of the disease, and understand its philosophy and the relation of the patient to the great Scheme of Nature, the matter of treatment I leave to you, and according to the System and Methods you may be using." (pg. 502) This is not only the best book ever written on medical astrology, it is also the best medieval medical reference ever put in print. This book excels in diagnosis, in other words, if the symptom is X, then the astrological cause is Y.

Which becomes the key to reading the patient's chart, or his decumbiture.

Cornell writes in traditional language. The same language, in fact, as you will find in Culpeper, Saunders, Lilly, Blagrave and many others. This book is the key that will open these and many more. Howard Leslie Cornell, M.D., (1872-1938) was a naturopathic physician with a practice in the US and India. In 1918 he set about to compile the medical references in his

many astrology books. As he himself wrote, it became a momentous task, eventually comprising two large ledgers. These were then arranged, classified, disentangled and wrote into readable form. Only at that point did he consider making a proper book of it, and set about retyping and rearranging yet again. The result of 15 years work was published in 1933. It has been in print, off and on, ever since. It remains the one indispensable medical astrology book. The Encyclopaedia of Medical Astrology repays close study. A page-by-page reading is most rewarding.

Medical astrology is a fascinating subject, yet undoubtedly a rather challenging one. In this work however, the author attempts to ease the path towards greater understanding of traditional astrological principles regarding health, as well as

Introducing some new experiential ideas. These have been developed through her long practice in this field. What can sometimes be helpful in studying a chart is to understand the psychological underlay to medical conditions inherent in the cosmic pattern. The many charts included in this work from the author's own casebook as well as the charts of some public figures both current and historical, suggest guidelines for interpretation. This book is recommended for anyone who is interested in exploring medical astrology in greater depth, and perhaps including some aspects of it in their own astrological work.

Derek and Julia Parker are two of the most famous and best-selling names in the field of astrology: their *Complete Astrologer* introduced thousands to the subject. With this new encyclopedia, they have produced

This is one of the most sophisticated medical astrology books ever written. Many of the finer points are dealt with. You know the head is ruled by Aries, but did you know the nasal bones are co-ruled by Scorpio? There are references to Vedic principles. A helpful diagram explains the subtle division of the urinary tract between Libra and Scorpio. Rulerships are given not only for areas of the body and its organs, but also for bones, muscles, arteries and veins. Terminology in the book is modern. Gemini's rulership of muscles includes the deltoid, biceps, supinator radii, subclavians, triceps, serratus anticus minor, pectoralis, palmaris, etc. Many chapters are unique, such as Chapter 5, on crystallization, and Chapter 6, on tonicity, atonicity, and perversion. This chapter also tells how pairs of planets mirror each other: Sun/Moon, Mars/Saturn, Jupiter/Venus,

**Uranus/Neptune**, with Mercury as a receiver. Chapter 11 concerns many different kinds of planetary strengths, among them, aspect strength, mundane strength, natural strength (the planet in its natal sign) and directional strength. Chapter 13 gives astrological indicators for some specific diseases, a foretaste of what Charles Carter would expand upon in his famous Encyclopaedia of Psychological Astrology. This book was originally published as Alan Leo's Astrological Manual No. 9 in 1908. This is the second edition of 1914. There are references in this book to other books in the Alan Leo series, dealing with chart construction. This book is highly recommended by H.L. Cornell in his Encyclopaedia of Medical Astrology. Heinrich Daath's Medical Astrology is part of a comprehensive series of classic astro-medical texts published by Astrology Classics. Other books in the

oracles in a spirit of critical but sympathetic inquiry. The emphasis is on a participatory and reflexive approach which is firmly post-positivist, seeking to understand the divinatory act on its own terms within widely varying contexts – ancient Greek and Chaldean philosophy and theurgy, Theravadan Buddhism, Biblical studies, Elizabethan Hermeticism, Jacobean drama, Heideggerian philosophy, Medieval scholasticism, 19th century occultism, contemporary Guatemalan divination and Western medical practice. The authors are all teachers or researchers in the area of divination and symbolism, which is a new disciplinary focus developing at the University of Kent, Canterbury under the aegis of the MA programme in the Cultural Study of Cosmology and Divination. The essays in this volume originally contributed to an international

This volume, a directory of astrological correspondences, is the result of a research project that drew together the thoughts of many others into a reference book, assuming the role of a dictionary to astrologers, but vastly more complete. It is the only place where all sign, planetary and house rulerships have been brought together and put in a good workable order. It is organized in such a way that one can use the book for quick and easy reference, and it eliminates the need to search through various other volumes. In four parts: an alphabetical listing, a listing by planets, a listing by signs, a listing by houses. Plus an Appendix with special listings: principal bones of the body, principal veins of the body, chart of an organization, flavors and handwriting
