The stars are the limit for a little girl who acts out her wish to be an astronaut — inspired by a very special person. Astrid has loved the stars and space for as long as she can remember. “I want to be an astronaut!” she says to everyone who will listen. While her mama is away, Astrid and her papa have fun acting out the challenges an astronaut faces on a space mission — like being in zero gravity (“I can do that all day long!” she says), eating food from a kind of tube, and doing science experiments with the help of cookie sheets. When at last it’s time to meet Mama at the air base, Astrid wears her favorite

The Routledge Companion to Career Studies is an in-depth reference for researchers, students, and practitioners looking for a comprehensive overview of the state of the art of career studies. Split into five parts, the volume looks at major areas of research within career studies and reflects on the latest developments in the areas of theory, empirical studies, and methodology. The book's five parts cover (1) major theoretical and methodological debates and approaches to studying careers; (2) careers as dynamic,

ongoing processes covering such issues as time, shaping careers, career outcomes and patterns, and the forces shaping careers; (3) the local, national, and global context of careers, (4) implementing career research to design practical interventions in areas such as education, counseling, and national policy; and (5) a commentary on the current state of career scholarship and its future development as represented in this volume, by founding scholars in the field. This book will be a sourcebook for scholars studying careers, research students intending to take up the study of careers, and anyone – scholars and practitioners – with an interest not only in understanding careers, the factors shaping them and where they lead, but also in how this understanding might be used in practice.

Work Careers brings together a stellar panel of experts from the fields of industrial and organizational psychology, counseling and clinical psychology, social psychology, organizational behavior, and human resource management. This volume offers a comprehensive exploration of how an individual's career unfolds from early childhood through retirement. Based on the most recent findings and current research, the volume also focuses on changes in the societal and organizational contexts of career development and reveals how context shapes and constrains individual career decisions.

Instead, it is a step-by-step method for writing a five-paragraph paper from the assignment through the final proofreading. Using sentence formulas, paragraph templates, and detailed checklists, the writer will be able to plug in subject matter for their assigned papers and build a finished product that is organized correctly. For writers who need to create a five-paragraph (2-3 page) paper, this booklet will guide them through the process of getting the words down on the page. It does not matter if that paper is meant to be informative or persuasive. Regardless of tone or style, this booklet can guide the writer through to a finished paper.

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.
