Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness, response, & short-term recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations.

Course Overview This course describes the role, design, and functions of Emergency Operations Centers and their relationships as components of a multi-agency coordination system. The course contains disaster-related examples, activities and case studies that relate to EOC's and multi-agency coordination systems at the local, state and federal levels of government. Course Objectives: At the end of the course, students should be able to: *Relate EOC operations to National Incident Management System (NIMS) requirements. *Describe the role that EOCs play in overall multiagency coordination. *Describe the relationship between the EOC and the on-scene Incident Command System (ICS) structure. *Identify staffing, information, systems, and equipment needs at the EOC. *Determine whether participants' EOC organizations are conducive to effective coordination. *Identify potential alternate locations suitable for EOC operations should the primary EOC facility become damaged or inoperable. *Create a test, training and exercise plan for critical EOC operations. *Develop a strategy and schedule for reviewing EOC resource requirements and technology needs.

Course Overview ICS 200 is designed to enable personnel to operate efficiently during an incident or event within the Incident Command System (ICS). ICS-200 provides training on and resources for personnel who are likely to assume a supervisory position within the ICS. The Emergency Management Institute developed ICS its ICS courses collaboratively with: National Wildfire Coordinating Group (NWCG) U.S. Department of Agriculture United State Fire Administration's National Fire Programs Branch Primary Audience Persons involved with emergency planning, response or recovery efforts. NIMS Compliance This course is NIMS compliant and meets the NIMS Baseline Training requirements for I-200. Prerequisites IS-100.a CEUs 0.3

Comprehensive Preparedness Guide (CPG) 101 provides Federal Emergency Management Agency (FEMA) guidance on the fundamentals of planning and developing emergency operations plans (EOP). CPG 101 shows that EOPs are connected to planning efforts in the areas of prevention, protection, response, recovery, and mitigation. Version 2.0 of this Guide expands on these fundamentals and encourages emergency and homeland security managers to engage the whole community in addressing all risks that might impact their jurisdictions. While CPG 101 maintains its link to previous guidance, it also reflects the reality of the current operational planning environment. This Guide integrates key concepts from national preparedness policies and doctrines, as well as lessons learned from disasters, major incidents, national assessments, and grant programs. CPG 101 provides methods for planners to: Conduct community-based planning that engages the whole community by using a planning process that represents the actual

File Type PDF Fema Nims 200 Test Answers 2015

population in the community and involves community leaders and the private sector in the planning process; Ensure plans are developed through an analysis of risk; Identify operational assumptions and resource demands; Prioritize plans and planning efforts to support their seamless transition from development to execution for any threat or hazard; Integrate and synchronize efforts across all levels of government. CPG 101 incorporates the following concepts from operational planning research and day-to-day experience: The process of planning is just as important as the resulting document; Plans are not scripts followed to the letter, but are flexible and adaptable to the actual situation; Effective plans convey the goals and objectives of the intended operation and the actions needed to achieve them. Successful operations occur when organizations know their roles, understand how they fit into the overall plan, and are able to execute the plan. Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all phases of emergency management and for all homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources it has or can obtain. Planners achieve unity of purpose through coordination and integration of plans across all levels of government, nongovernmental organizations, the private sector, and individuals and families. This supports the fundamental principle that, in many situations, emergency management and homeland security operations start at the local level and expand to include Federal, state, territorial, tribal, regional, and private sector assets as the affected jurisdiction requires additional resources and capabilities. A shared planning community increases the likelihood of integration and synchronization, makes planning cycles more efficient and effective, and makes plan maintenance easier.

This guidance was developed in coordination with Federal, State, tribal, and local Public Information Officers (PIOs). The goal of this publication is to provide operational practices for performing PIO duties within the Incident Command System (ICS). It offers basic procedures to operate an effective Joint Information System (JIS). During an incident or planned event, coordinated and timely communication is critical to effectively help the community. Effective and accurate communication can

File Type PDF Fema Nims 200 Test Answers 2015

save lives and property, and helps ensure credibility and public trust. This Basic Guidance for Public Information Officers provides fundamental guidance for any person or group delegated PIO responsibilities when informing the public is necessary. The guidance also addresses actions for preparedness, incident response, Joint Information Centers (JICs), incident recovery, and Federal public information support. The guidance material is adaptable to individual jurisdictions and specific incident conditions.

Course Overview Effective partnerships form and evolve because the individual partners have an understanding, appreciation, and respect for one another that is acquired through education and life experiences. This course is designed to provide you with the basic knowledge to: -Build effective partnerships with tribal governments. -Work in concert with tribal governments to protect native people and property against all types of hazards. Throughout this course tribal representatives speak to us about their history, their culture, their way of life, and what we need to know to develop good relationships with tribal communities. These representatives provide insight into tribal communities that have endured great suffering and faced many challenges while remaining proud and committed to caring for one another, their land, and their traditions. Several lessons are devoted to specific program challenges that you may encounter in working with tribal governments to provide financial and technical assistance through the Individual Assistance, Public Assistance, and Hazard Mitigation Programs. For example, the course addresses how to let native people who live in remote areas and are not served by traditional print and mass media know about how and where to apply for disaster assistance. The program challenges presented in the course reflect actual experiences of native people and FEMA representatives working together before, during, and after disasters to deliver assistance in Indian Country.

The results of the official Congressional investigation into the government's preparation for and response to Hurricane Katrina in 2005.
