A substantial portion of the population finds accounting a very dry, boring subject; one with the capacity to draw figurative blinders over one's eyes, rendering them unable to absorb anything related to facts and figures. On the other hand, there is a select segment of the population who revel in their understanding of such concepts and mentally play numbers games on their commute, just ...

Module Overview. The module is intended to introduce students to regulation in financial reporting and to examine specific problem areas using a conceptual framework as a basis of the analysis. This allows an evaluation of current external reporting practice within the context of accounting theory. This will involve an examination of the regulatory framework of financial reporting, i.e. UK and EU company law, the UK Accounting Standards Board and the International Accounting Standards Board.

This book presents contemporary issues in financial reporting of Islamic financial institutions. Two key areas are covered namely, accounting for Islamic financial transactions and shariah governance. The main motivation to publish this book is to share our understanding on the unique nature of Islamic finance industry and the approach to be taken in accounting and reporting of Islamic financial transactions. Also, the book illustrates the importance of shariah governance in ensuring end-to-end shariah compliance. This book is to provide a practical guidance to researchers, industry practitioners and the other stakeholders.

Consolidated Financial Reporting introduces and examines what is currently the most central and controversial area in financial reporting. In an innovative and distinctive way the author integrates concepts, techniques, controversies and current practice. Techniques are introduced within a framework which shows why they work and what the figures mean. Controversial issues are grounded within modern accounting theory and practice. All core areas and relevant standards are covered including: acquisition and merger accounting; fair values at acquisition; goodwill; consolidated cash flow statements; reporting consolidated financial performance; foreign currency translation; segmental reporting; off-balance sheet financing; and related party transactions. The book is designed so that readers with particular interests - for example in technical matters or concepts and standards - can easily find their way through clearly marked sections. Discussion and calculation reinforce each other - calculations illustrate controversies, and controversies and concepts illustrate techniques. Examples are carefully graduated and care is taken not to obscure principles with unnecessarily complex calculations. Materials are set into

an international context. The book is both rigorous and accessible. It is an extensive revision of and successor to the author's 1987 title Consolidated Financial Statements. Because of recent theoretical and institutional developments, an enormous amount of new material has been added and new teaching approaches to many areas included. There are many more worked examples and exercises as well as approachable discussions of 'state-of-the-art' advanced topics. The solutions notes for each case are available on a disk for instructors who recommend the book for course use.
