The aim of my healing journey was not only to lengthen my life but also to have quality of life, even while I was in the process of healing. I was diagnosed in January 2009 with breast cancer which had metastasized into one of the lymph nodes under my arm. I was told by the doctor, I had probably 5 years to live if I did not undertake the conventional treatment of chemotherapy and radiation. After witnessing the effects of chemotherapy in my mom, I was reluctant to follow the same treatment. After researching the pros and cons of alternate treatment, I made the decision to set out on a journey less travelled. I was determined to live . My son was only 15 years old and I didn't want him to grow up without a mother. I had to search hard to gain understanding of what it would take to restore health in my body. I discovered that to heal cancer naturally, a holistic approach has to be taken. I learned that I needed to give attention to not only the body but also the mind (emotions), soul and spirit. It was very important for me to realise that cancer is as a result of a compromised immune system and to overcome it, this would need to be rectified. Through this journey, I achieved more than just physical healing. I also experience a tremendous amount of self growth and emotional healing. I can truly say that at 61 I am more energetic and comfortable in my body and mind now, than I was at 45. In this book I share every step of the healing process in detail. Furthermore, the healing modalities that I used are accompanied by research, citations and scientific studies. Some of the healing modalities discussed in the book are:

Ever ask yourself why there is still no cure for cancer? Are there cures for what heretofore has been thought impossible? Perhaps there is! Learn how to effectively treat and yes, even cure cancer.

Fifteen years Cancer Free.... I had a CAT scan and went to the lung specialist office (in the same building). We waited an extra long time for the doctor to come into the consultation room. When he finally came in you could tell from his voice and his demeanor that he was agitated, perhaps frustrated. The first words out of his mouth in a loud and obviously stressed voice were, "Mr. Lawson, you had cancer and now it's gone and I don't know what happened!" I replied, "Would you like for me to tell you." His response floored me when he said, "I don't want to hear it!" I still haven't understood that comment after all of these years... If there were a way to help patients, without chemo, radiation or surgery, wouldn't you logically, as a doctor, want to know about it? In this book I share my journey to Health and Hope through the use of Herbs as well as many insights into the use of herbs. It is by no means "all inclusive," but will give you a place to start to come to terms with the use of Alternative Medicine. Perhaps it will give you hope again also.

Hope for Cancer challenges Western medicine's status quo by incorporating a more holistic approach to cancer treatments. It asks the reader, "What if virtually everything you know about cancer is wrong?" and, "What if your journey back to wellness didn't necessarily involve a scalpel, toxic drugs, or damaging radiation?" This life-affirming treatise is designed with the end-user in mind: the cancer patient who is tired of being misled, willing to take ownership of their future, and open to an education that could save his or her life. Dr. Jimenez rolls over 30 years of experience into a remarkable book that describes his 7 Key Principles of Cancer Therapy - a treatment philosophy that has found increasing validation in the recent scientific and medical oncology literature.
