The third generation HTC One M9 was announced in March of 2015. The phone has numerous upgraded features compared to the HTC One M8 including individual notifications, better camera quality, battery saving options, high quality audio and a higher resolution screen. The phone is programmed so that it works to personalize its features to work with the habits and activities of individual users and offer helpful apps and information at the right time. It also has many useful default apps and a large selection of additional apps which add to the user ' s experience. An enhanced user interface, which runs on the latest version of Android, also makes the phone simpler to use than its predecessors. One of the top advantages of the phone over its competitors is the large storage capacity and it is a favorite among music lovers who want to listen to quality audio and be able to save more of their music on a mobile device.

In 2013, HTC launched the One, a device that defined their vision of an Android flagship rooted in strong design and build quality and relying on powerful hardware and a slimmed-down Sense interface. Two years later HTC continues to refine the formula with the HTC One M9, a smartphone that borrows heavily from the past in the hopes that it might push us more firmly into the future.

Our full review of the HTC One M8 covers this premium phone in-depth, from BoomSound and UltraPixel to Display and Processor.

The HTC Vivid is a 4G Android smartphone, and one of the first to receive the Android 4.0 Ice Cream Sandwich update. The Ice Cream Sandwich operating system opens up new possibilities and improves the performance of the Vivid.
