This book is intended to help managers, quality professionals, internal audit coordinators, and internal auditors implement a practical internal audit process that meets the requirements of ISO 9001:2015 while adding significant, measurable value to the organization. The tools, techniques, and step-by-step guidelines provided in this book can also be used by those organizations that have a well-established internal audit process but are looking for easy ways to make that process more effective. This book addresses the practice of internal auditing using GAAS (Generally Accepted Auditing Standards), GAGAS (Generally Accepted Government Auditing Standards) and International Standards for the Professional Practice of Internal Auditing (Standards) as enunciated by the IIA. Unique in that it is primarily written to guide internal auditors in the process and procedures necessary to carry out professionally accepted internal audit functions, it includes everything necessary to start, complete and evaluate an internal audit practice, simplifying the task for even non-professionals.

The Institute of Internal Auditors' (IIA's) International Professional Practices Framework (IPPF) is the authoritative guidance on the internal audit profession. The IPPF presents current, relevant, internationally consistent information that is required by internal audit professionals worldwide. The new IPPF features improved clarity, increased transparency, measurable accountability, a defined cycle of review for all guidance, and availability in hard copy and as a fully interactive CD-ROM.

This book helps auditors understand the reality of performing the internal audit role and the importance of properly managing ethical standards. It provides many examples of ethical conflicts and proposes alternative actions for the internal auditor. Internal auditors are well-schooled on the IIA Standards, but the reality is that the pressure placed on internal auditors related to execution of work and upholding ethical standards can be very difficult. Regardless of best practice or theory, auditors must be personally prepared to manage through issues they run across.
