Behavioral-based intervention in designing public policies has become an important field of study in recent years with empirical studies devoted to analyzing how to design better policies from the fields of behavioral economics, social psychology, sociology, anthropology, economy, political science, design (human-centered design and design thinking), or effective state and non-state bureaucracies throughout the world. Therefore, it is important to explore this original research on behavioral policymaking that starts from the development of policies following all the way through to the implementation of them and the many stages in between. Current research on public policy seeks to provide insights and support leadership in public administration within the framework of behavioral science. Behavioral-Based Interventions for Improving Public Policies aims to provide a glimpse of the theoretical frameworks in use and some of the latest practical reported research findings for behavioral-based intervention in designing public policies. The chapters will explore policymaking knowledge applied in different types of communities and cultural environments. While highlighting topic areas that include policymaking, policy infrastructure, and policy adoption, this book is ideally intended for professionals and researchers working in the fields of policymaking, administrative sciences and management, behavioral economics, social psychology, sociology, anthropology, economy, or political science along with practitioners, stakeholders, academicians, and students.

Two works with separate titlepages and pagination published in one volume.

Based on Big Nerd Ranch 's popular iPhone Bootcamp class, iPhone Programming: The Big Nerd Ranch Guide leads you through the essential tools and techniques for developing applications for the iPhone, iPad, and iPod Touch. In each chapter, you will learn programming concepts and apply them immediately as you build an application or enhance one from a previous chapter. These applications have been carefully designed and tested to teach the associated concepts and to provide practice working with the standard development tools Xcode, Interface Builder, and Instruments. The guide 's learn-while-doing approach delivers the practical knowledge and experience you need to design and build real-world applications. Here are some of the topics covered: Dynamic interfaces with animation Using the camera and photo library User location and mapping services Accessing accelerometer data Handling multi-touch gestures Navigation and tabbed applications Tables and creating custom rows Multiple ways of storing and loading data: archiving, Core Data, SQLite Communicating with web services ALocalization/Internationalization "After many 'false starts' with other iPhone development books, these clear and concise tutorials made the concepts gel for me. This book is a definite must have for any budding iPhone developer." – Peter Watling, New Zealand, Developer of BubbleWrap

The role of artificial intelligence (AI) applications in fields as diverse as medicine, economics, linguistics, logical analysis and industry continues to grow in scope and importance. AI has become integral to the effective functioning of much of the technical infrastructure we all now take for granted as part of our daily lives. This book presents the papers from the 21st biennial European Conference on Artificial Intelligence, ECAI 2014, held in Prague, Czech Republic, in August 2014. The ECAI conference remains Europe's principal opportunity for researchers and practitioners of Artificial Intelligence to gather and to discuss the latest trends and challenges in all subfields of AI, as well as to demonstrate innovative applications and uses of advanced AI technology. Included here are the 158 long papers and 94 short papers selected for presentation at the conference. Many of the papers cover the fields of knowledge representation, reasoning and logic as well as agent-based and multi-agent systems, machine learning, and data mining. The proceedings of PAIS 2014 and the PAIS System Demonstrations are also included in this volume, which will be of interest to all those wishing to keep abreast of the latest developments in the field of AI.
