established as both a crossroads and as a vital part of Middle America. Indiana ' s stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

Asia—not only as one of the world's most populous and poorest regions—but as a hinge between East Asia, Central Asia, the Middle East, and Europe. The book is aimed at politicians, technocrats, civil society organizations, and businesses. It presents case studies of past and recent corridor initiatives, provides rigorous analysis of the literature on the spatial impact of corridors, and offers assessments of corridor investment projects supported by international development organizations. A series of spotlights examines such issues as private sector co-investment; the impacts of corridors on small enterprises and women; and issues with implementing cross-border corridors. The 'WEB' in the title stands for both the wider economic benefits (WEB) that

Combining his artistic abilities, wild imagination, and his passion for small houses, he self-published *Humble Homes, Simple Shacks, Cozy Cottages, Ramshackle Retreats, Funky Forts, and Whatever the Heck Else we could Squeeze in Here* in 2009. This book is a collection of Diedricksen 's creative/imaginative sketches for building small houses, shacks, cottages, and forts. The sketches are accompanied with hand-written commentary, both instructive and comical. The Japanese automotive industry enjoyed spectacular success in the 1980s. This was largely due to the so-called 'Lean Production System' - the combination of an efficient production system, an effective supplier system, and a product development system. In the 1990s the industry fell on hard times because of the Japanese asset price bubble and extreme currency appreciation. In this book, eminent industry specialist Koichi Shimokawa draws on his thirty years of research and fieldwork with Japanese and American firms, to show how the Japanese automotive industry has managed to recover from this difficult period. He shows how firms like Toyota were able to transfer Japanese systems to overseas plants and how

Catfish Dream centers around the experiences, family, and struggles of Ed Scott Jr. (born in 1922), a prolific farmer in the Mississippi Delta and the first ever nonwhite owner and operator of a catfish plant in the nation. Both directly and indirectly, the economic and political realities of food and subsistence affect the everyday lives of Delta farmers and the people there. Ed ' s own father, Edward Sr., was a former sharecropper turned landowner who was one of the first black men to grow

rice in the state. Ed carries this mantle forth with his soybean and rice farming and later with his catfish operation, which fed the black community both physically and symbolically. He provides an example for economic mobility and activism in a region of the country that is one of the nation ' s poorest and has one of the most drastic disparities in education and opportunity, a situation especially true for the Delta ' s vast African American population. With *Catfish Dream* Julian Rankin provides a fascinating portrait of a place through his intimate biography of Scott, a hero at once so typical and so exceptional in his community.
