composer, Kepler (opera) (2009), homage to Johannes Kepler, commissioned by the city of Linz, where the astronomer lived.

Harmonices Mundi - Wikipedia

The music of Dutch composer Joep Franssens defies easy categorization. The individualist tendencies of his teacher Louis Andriessen are evident, as well as an embrace of the sounds of both American and eastern European minimalism, along with an unabashed lyrical impulse. Roaring Rotterdam (1997) is a highly attractive work for orchestra that has some of the throbbing, exuberant energy of the ...

Joep Franssens: Roaring Rotterdam; Harmony of the Spheres ...

Joep Franssens wants in his spiritually tinted music to bridge the gap between the rational and irrational, the reasoned and intuitive and the mind and the heart. He strives to achieve a universal, understandable musical language – music filled with sonorous, dramatic gestures, a clear structure, and with a direct, physical impact. Franssens draws inspiration from the sound of pop music, the ...

As the landscape of choral education changes - disrupted by Glee, YouTube, and increasingly cheap audio production software - teachers of choral conducting need current research in the field that charts scholarly paths through contemporary debates and sets an agenda for new critical thought and practice. Where, in the digitizing world, is the field of choral pedagogy moving? Editor Frank Abrahams and Paul D. Head, both experienced choral conductors and teachers, offer here a comprehensive handbook of newly-commissioned chapters that provide key scholarly-critical perspectives on teaching and learning in the field of choral music, written by academic scholars and researchers in tandem with active choral conductors. As chapters in this book demonstrate, choral pedagogy encompasses everything from conductors' gestures to the administrative management of the choir. The contributors to The Oxford Handbook of Choral Pedagogy address the full range of issues in contemporary choral pedagogy, from repertoire to voice science to the social and political aspects of choral singing. They also cover the construction of a choral singer's personal identity, the gendering of choral ensembles, social justice in choral education, and the role of the choral art in society

more generally. Included scholarship focuses on both the United States and international perspectives in five sections that address traditional paradigms of the field and challenges to them; critical case studies on teaching and conducting specific populations (such as international, school, or barbershop choirs); the pedagogical functions of repertoire; teaching as a way to construct identity; and new scholarly methodologies in pedagogy and the voice.

In *Thresholds* Marcel Cobussen rethinks the relationship between music and spirituality. The point of departure is the current movement within contemporary classical music known as New Spiritual Music, with as its main representatives Arvo P?, John Tavener, and Giya Kancheli. In almost all respects, the musical principles of the new spiritual music seem to be diametrically opposed to those of modernism: repetition and rest versus development and progress, tradition and familiarity versus innovation and experiment, communication versus individualism and conceptualism, tonality versus atonality, and so on. As such, this movement is often considered as part of the much larger complex called postmodernism. Joining in with ideas on spirituality as presented by Michel de Certeau and Mark C. Taylor, Cobussen deconstructs the classification of the 'spiritual dimensions' of music as described above. *Thresholds* presents an idea of spirituality in and through music that counters strategies of exclusion and mastering of alterity and connects it to wandering, erring, and roving. Using the philosophy of Martin Heidegger, Georges Bataille, Jean-Fran?is Lyotard, Jacques Derrida and others, and analysing the music of John Coltrane, the mythical Sirens, Arvo P?, and The Eagles (to mention a few), Cobussen regards spirituality as a (non)concept that escapes categorization, classification, and linguistic descriptions. Spirituality is a-topological, non-

discursive and a manifestation of 'otherness'. And it is precisely music (or better: listening to music) that induces these thoughts: by carefully encountering, analysing, and evaluating certain examples from classical, jazz, pop and world music it is possible to detach spirituality from concepts of otherworldliness and transcendentalism. Thresholds opens a space in which spirituality can be connected to music that is not commonly considered in this light, thereby enriching the ways of approaching and discussing music. In orde

This book explores the ways in which music can engender religious experience, by virtue of its ability to evoke the ineffable and affect how the world is open to us. Arguing against approaches that limit the religious significance of music to an illustrative function, *The Extravagance of Music* sets out a more expansive and optimistic vision, which suggests that there is an 'excess' or 'extravagance' in both music and the divine that can open up revelatory and transformative possibilities. In Part I, David Brown argues that even in the absence of words, classical instrumental music can disclose something of the divine nature that allows us to speak of an experience analogous to contemplative prayer. In Part II, Gavin Hopps contends that, far from being a wasteland of mind-closing triviality, popular music

frequently aspires to elicit the imaginative engagement of the listener and is capable of evoking intimations of transcendence. Filled with fresh and accessible discussions of diverse examples and forms of music, this ground-breaking book affirms the disclosive and affective capacities of music, and shows how it can help to awaken, vivify, and sustain a sense of the divine in everyday life.

The authors have presented and interpreted Johannes Kepler's Latin text to English readers by putting it into the kind of clear but earnest language they suppose Kepler would have used if he had been writing today.

Voor de discipline of het vak filosofie op elk onderwijsniveau bestaat de behoefte aan een bruikbaar en geactualiseerd woordenboek. In niet mindere mate geldt dit ook voor de ruimere kring van het meestal erudiete – niet-filosofische geschoolde – lezerspubliek. In dit gemis wordt met dit Woordenboek Filosofie voorzien. Het woordenboek kenmerkt zich door de presentatie van uitsluitend filosofische termen en begrippen. Biografieën van filosofen zijn bewust niet opgenomen, wel worden stromingen, richtingen of scholen behandeld, die verwant zijn aan het denken van bepaalde filosofen, zoals platonisme, aristotelisme, stoïcisme, thomisme, spinozisme, kantianisme, hegelianisme, nietscheanisme, lacanisme, enz. Ook stromingen met een filosofische achtergrond komen uitgebreid aan bod, zoals anarchisme, liberalisme en marxisme. In deze herziene editie zijn ook nieuwe wijsgerige

Bookmark File PDF Joep Franssens Harmony Of The Spheres Score

termen opgenomen, die voortkomen uit recente filosofische ontwikkelingen op sociaal-economisch, politiek, technisch-technologisch, moreel-ethisch en natuurfilosofisch gebied. Een prominente plaats werd voorbehouden voor de discipline ' genderstudies ', die de voorbije twintig jaar een belangrijke ontwikkeling heeft doorgemaakt. Daarnaast mag in een hedendaags woordenboek filosofie de niet-westerse filosofie in al haar vormen, niet ontbreken. De belangrijkste stromingen worden besproken, alsook de essentiële basisgedachten van de betreffende filosofieën.
