Around the globe, unfettered industrialisation has marched forth in unison with massive social inequities. Making matters worse, anthropogenic pressures on Earth's living systems are causing alarming rates of thermal expansion, sea-level rise, biodiversity losses in terrestrial and aquatic ecosystems and a sixth mass extinction. As various disciplines have shown, rich white men in the Global North are the main (although not the only) perpetrators of this slow violence. This book demonstrates that industrial/breadwinner masculinities have come at terrible costs to the living

planet and ecomodern masculinities have failed us as well, men included. This book is dedicated to a third and relationally focused pathway that the authors call ecological masculinities. Here, they explore ways that masculinities can advocate and embody broader, deeper and wider care for the global through to local ('glocal') commons. Ecological Masculinities works with the wisdoms of four main streams of influence that have come before us. They are: masculinities politics, deep ecology, ecological feminism and feminist care theory. The authors work with profeminist approaches

to the conceptualisations and embodiments of modern Western masculinities. From there, they introduce masculinities that give ADAM-n for Earth, others and self, striving to create a more just and ecologically viable planet for all of life. This book is interdisciplinary. It is intended to reach (but is not restricted to) scholars exploring history, gender studies, material feminism, feminist care theory, ecological feminism, deep ecology, social ecology, environmental humanities, social sustainability, science and technology studies and philosophy.

Despite vaccines and medicines, we have not succeeded in eradicating the most poisonous viruses in the world, like jaundice, measles, diarrhea, polio, and AIDS, not to mention newcomers like West Nile and SARS. Also, since September 11, it is no longer unthinkable that a terrorist would intentionally spread a virus among people or the food chain. In this book, Jaap Goudsmit argues that there is no such thing as life without viruses for many reasons; including the fact that many viruses spread without any visible signs, and can hide in animals; that there are too many different species of

viruses and they multiply much faster than any animal or plant; and that infections strike especially in areas where life is difficult enough already, such as Africa and Asia. However, Goudsmit continues, if viruses hold onto life so stubbornly, perhaps they can be useful to other living beings. Do viruses offer people a better chance of survival in a hostile world? Do viruses make people fitter? Some viruses seem to play a role in the process whereby our genes adapt to the environment. What is it that makes viruses incredibly strong, and can we learn something from it? What is the secret of the

enormous "fitness" of viruses? Will viruses spell the end of mankind or will man always be able to offer resistance? This book attempts to answer these and other questions.

Mother Teresa. Vaclav Havel, the former president of the Czech Republic, finds value in seemingly doomed or futile actions taken by oppressed peoples. Rosemarie Freeney Harding recalls the music that sustained the civil rights movement, and Paxus Calta-Star recounts the powerful vignette of an 18-year-old who launched the overthrow of Bulgaria's dictatorship. Many of the essays are new, others classic works that continue to inspire. Together, these writers explore a path of heartfelt community involvement that leads beyond despair to compassion and hope. The voices collected in *The Impossible Will*

Take a Little While will help keep us all working for a better world despite the obstacles.

In this volume, a distinguished set of international scholars examine the nature of collaboration between life partners in the sciences, with particular attention to the ways in which personal and professional dynamics can foster or inhibit scientific practice. Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit, the studies scrutinize collaboration as a variable

process between partners living in the nineteenth and twentieth centuries who were married and divorced, heterosexual and homosexual, aristocratic and working-class and politically right and left. The contributors analyze cases shaped by their particular geographical locations, ranging from retreat settings like the English countryside and Woods Hole, Massachusetts, to university laboratories and urban centers in Berlin, Stockholm, Geneva and London. The volume demonstrates how the terms and meanings of collaboration, variably shaped by disciplinary imperatives, cultural mores, and

Fifteen years ago, Dorion Cairns concluded an article on phenomenology with a cautious appraisal of its influence in America. "Thus far," he wrote, "it continues to be an exotic." The situation today has changed: translations of the writings of Husserl, Heidegger, Marcel, Sartre, and Merleau-Ponty have appeared, and commentaries on these and related thinkers are not uncommon. Moreover,

discussion of phenomenological problems is increasingly becoming part of the American (if not the British) philosophical scene. Phenomenology is in danger of domestication! Signs of its accommodation include a willingness to pay tribute to Husserl's Logical Investigations by those who find relatively little to interest them in his later work, a location of what are taken to be common themes and underlying convergences of emphasis in Continental phenomenology and Anglo-American philosophy of the more nearly Wittgensteinian and Austinian varieties, and a growing impatience (shared by some

phenomenologists) with expositions, explications, and interpretations of Husserl's work at the expense of original applications of phenomenology. Most bluntly put, the attitude is: Don't talk about it; do it! It would seem that we have arrived at a point where introductions to phenomenology are of doubtful value, if not superfluous. The present collection of essays is based on different assumptions and points to an alternative conception of the role of both methodology and originality in phenomenological work.
