Requests, a speech act people frequently use to perform everyday social interactions, have attracted particular attention in politeness theories, pragmatics, and second language acquisition. This book looks at request behaviours in a significant EFL population - Chinese speaking learners of English. It will draw on recent literature, such as politeness theories and cognitive models for interlanguage pragmatics development, as well as placing special emphasis on situational context and formulaic language to provide a more fine-grained investigation. A range of request scenarios has been specifically designed for this project, from common service encounters to highly face-threatening situations such as borrowing money and asking a favour of police officer. Our findings on Chinese-style pragmatic behaviours and patterns of pragmatic development will be of value to cross-cultural pragmatics researchers, TESOL professionals, and university students with an interest in this area of study.

Students can become familiar with legal syntax and legal vocabulary in this introduction to basic legal information and the U.S. legal system.

Updated and revised with more examples and expanded discussions, this second edition continues the aim of providing teachers with a solid understanding of the use and function of grammatical structures in American English. The book avoids jargon and presents essential grammatical structures clearly and concisely. Dr. DeCapua approaches grammar from a descriptive rather than a prescriptive standpoint, discussing differences between formal and informal language, and spoken and written English. The text draws examples from a wide variety of authentic materials to illustrate grammatical concepts. The many activities throughout the book engage users in exploring the different elements of grammar and in considering how these elements work together to form meaning. Users are encouraged to tap into their own, often subconscious, knowledge of grammar to consciously apply their knowledge to their own varied

teaching settings. The text also emphasizes the importance of understanding grammar from the perspective of English language learners, an approach that allows teachers to better appreciate the difficulties these learners face. Specific areas of difficulties for learners of English are highlighted throughout.

This volume encompasses a thorough examination of the use of request strategies on two contrastive dimensions. On the cross-cultural dimension, it compares the use of British and American English request strategies in naturally occurring informal conversations. The conversational data are retrieved from the International Corpus of English (ICE) and the Santa Barbara Corpus of Spoken American English. On the methodological dimension, it systematically compares request strategies and their frequency distributions in the conversational data to questionnaire-based requests. Highlighting various instrument-induced effects, the volume challenges the validity of one of the most widely used and accepted data collection tools in pragmatics research, the DCT. The extensive data analysis contained in the volume includes a wide range of linguistic variables including mitigating and aggravating modification strategies and their interaction with head act directness levels. While it focuses on the first-pair part, the book also offers an analysis of request responses from a cross-cultural perspective. The findings of the study contribute new insights to research on requests, politeness, variational pragmatics, and general research methodology.

The purpose of this research is to analyse the pragmatic development of language groups at different proficiency levels and to investigate the relationship between interlanguage pragmatics and grammatical competence. For this study, 36 native Spanish speaking EFL learners at different proficiency levels were asked to respond in English to 24 different situations that called for the speech acts of request and apology. Results showed three important aspects. The first finding suggested that basic adult learners possess a pragmatic knowledge in their L1 that allows them to focus on the intended meaning and, in most cases, to assemble an utterance that conveys a pragmatic intention and satisfies the communicative demands of a social situation. The second finding revealed that there are two essential conditions to communicate a linguistic action: the knowledge of the relevant linguistic rules and the knowledge of how to use them appropriately and effectively in a specific context. The findings further suggested that advanced learners possess the grammatical knowledge to produce an illocutionary act, but they need to learn the specific L2 pragmatic conventions that enable them to know when to use these grammatical forms and under which circumstances.

This is the first edited volume dedicated specifically to interlanguage request modification. It is a collection of empirical studies carried out by an international array of scholars which provides insights for researchers, graduate students and language teachers on patterns of interlanguage request modification in a range of research contexts and linguistic/cultural settings. The research in this volume takes the reader from a consideration of interlanguage request modification in naturally-occurring e-mail data, through to elicited data from e-DCT questionnaires on cyber-consultations, to the interactive oral discourse of requests in open role-plays. As a whole, the contributions incorporate research with learners from a range of proficiency levels and from diverse linguistic/cultural backgrounds while the chapters individually examine developmental aspects of interlanguage request modification, requests in electronic contexts, comparative learner/native speaker requests, and instructional effects on mitigation. The book will undoubtedly become an important reference for researchers and teachers not only in the field of pragmatics but also in second language acquisition, language teaching, (socio-)linguistics and discourse analysis.

Drawing on everyday telephone and video interactions, this book surveys how English speakers use grammar to formulate responses in ordinary conversation. The authors show that speakers build their responses in a variety of ways: the responses can be longer or shorter, repetitive or not, and can be uttered with different intonational 'melodies'. Focusing on four sequence types: responses to questions ('What time are we leaving?' - 'Seven'), responses to informings ('The May Company are sure having a big sale' - 'Are they?'), responses to assessments ('Track walking is so boring. Even with headphones' - 'It is'), and responses to requests ('Please don't tell Adeline' - 'Oh no I won't say anything'), they argue that an interactional approach holds the key to explaining why some types of utterances in English conversation seem to have something 'missing' and others seem overly wordy.

Music in the American Diasporic Wedding explores the complex cultural adaptations, preservations, and fusions that occur in weddings between couples and families of diverse origins. Discussing weddings as a site of negotiations between generations, traditions, and religions, the essays gathered here argue that music is the mediating force between the young and the old, ritual and entertainment, and immigrant lore and assimilation. The contributors examine such colorful integrations as klezmer-tinged Mandarin tunes at a Jewish and Taiwanese American wedding, a wedding services industry in Chicago's South Asian community featuring a diversity of wedding music options, and Puerto Rican cultural activists dancing down the aisles of New York's St. Cecilia's church to the thunder of drums and maracas and rapping their marriage vows. These essays show us what wedding music and performance tell us about complex multiethnic diasporic identities and remind us that how we listen to and celebrate otherness defines who we are.
