MANAGEMENT OF MOTOR SPEECH Disorders in Children and Adults emphasizes how to make clinical decisions based on the underlying neuropathology and severity OF the disorder. The third edition OF this must-have book covers basic neurologic and general information associated with the various diseases, disorders, and syndromes that cause MOTOR SPEECH disorders, and it will serve as an excellent reference source for those practicing in a medical setting. This text contains several noteworthy modifications. 1. DVD - contains 26 video segments showing children and adults with dysarthria and apraxia OF SPEECH engaged in a range OF speaking tasks. Intelligibility, aerodynamic, and endoscopic assessments OF SPEECH performance are illustrated, as are brief demonstrations and interviews with a prosthodontist and a SPEECH-language pathologist involved in respiratory, palatal lift, and nasal obturation interventions. 2. ANCDs - content from the eight recently published practice guidelines developed by the Academy OF Neurologic Communication Disorders and Sciences (ANCDs)

for the MOTOR SPEECH disorders field are integrated into this edition. 3. ICF - terminology and concepts OF the International Classification OF Function, Disability and Health (ICF) model are integrated through the book 4. New Chapter 13 - lists conditions associated with MOTOR SPEECH disorders and summarizes the medical aspects and SPEECH characteristics OF various conditions. Complete Kit Includes: Textbook and Video Segments DVD. c2010

Derived from a conference on clinical dysarthria in San Antonio, in 1990, 19 papers report on clinical and research developments in neuromotor speech disorders for the benefit of speech-language pathologists and researchers, and graduate students in the field. The sections cover theoretical approaches, intelligibility, specific disorders, physiology, and apraxia. Annotation copyrighted by Book News, Inc., Portland, OR

Provides clinically relevant information for clinicians and students. Addresses theory, assessment procedures, treatment and management, issues in swallowing and feeding, stuttering, augmentative and alternative communication methods, and functional treatment outcomes. Extensive references.

In this document the Government sets out a programme of action designed to position the UK as a long-term leader in communications, creating an industrial framework that will fully harness digital technology. The UK's digital dividend will transform the way business operates, enhance the delivery of public services, stimulate communications infrastructure ready for next-generation distribution and preserve Britain's status as a global hub for media and entertainment. This approach seeks to maximise the digital opportunities for all citizens. The report contains: (1) an analysis of the levels of digital participation, skills and access needed for the

digital future, with a plan for increasing participation, and more coherent public structures to deal with it; (2) an analysis of communications infrastructure capabilities; (3) plans for the future growth of creative industries, proposals for a legal and regulatory framework for intellectual property and proposals on skills and investment support and innovation; (4) a restatement of the need for specific market intervention in the UK content market, with implications and challenges for the BBC and C4 Corporation and other forms of independent and suitably funded news; (5) an analysis of the skills, research and training markets, and what supply side issues need addressing for a fully functioning digital economy; (6) a framework for digital security and digital safety at international and national levels and recognition that a world of high speed connectivity needs a digital framework not an analogue one; (7) a review of what all of this means for the Government and how digital governance in the information age demands new structures, new safeguards, and new data management, access and transparency rules.

In our everyday communication, we transfer sentences, concepts, thoughts and ideas. How, though, is the speaker able to convert these into movements of the speech apparatus? This volume presents state-of-the-art research in the science of speech motor control and speech disorders.
