Operations Management Master's degree programme, full-time or part-time. In a dynamic, global economy, it is those enterprises that have an efficient and customer-oriented approach to production that are successful. This means they rely on executives, who develop the appropriate strategies, who plan and control production, optimise processes and carry out projects successfully with their team.

Marketplace complexity and dynamics create an environment that increases the uncertainty of innovation activities. In this context systematic management of innovation and product management are increasingly important for company success. This book presents the fundamentals of innovation and product management and introduces the reader to a holistic process model with particular focus on innovation and uncertainty. This integrated consideration of innovation management and product innovation within an interdisciplinary approach represents a unique characteristic of this book. The book is designed to address the needs of managers who want a practical but well-researched guide to innovation and product management. Graduate and advanced undergraduate students would also find the chapters in this book particularly useful.

Das erste umfassende Handbuch für die tägliche Praxis der Online Marketing Manager Online Marketing Manager sehen sich mit vielfältigen Herausforderungen konfrontiert. Sie müssen in allen Bereichen des Online-Marketings über fundiertes Wissen verfügen, Strategien und Kampagnen erarbeiten sowie Kennzahlen auswerten können. Aus dem Inhalt: - Online-Marketing: Entwicklung und Status quo: Felix Beilharz - Die Online-Marketing-Strategie: Olaf Kopp - Conversion-Optimierung: Nils Kattau - SEO – Suchmaschinenoptimierung: Anke Probst - SEA – Search Engine: Marketing Guido Pelzer - Display Advertising: Wolfgang Neider - E-Mail-Marketing: Manuela Meier - Social Media Marketing: Felix Beilharz - Mobile Marketing: Ingo Kamps - Web Analytics: Markus Vollmert - Online-Marketing-Recht: Niklas Plutte - Weiterbildung für Online Marketing Manager: Felix Beilharz

This volume constitutes the refereed proceedings of the Confederated International International Workshop on Enterprise Integration, Interoperability and Networking (EI2N), Fact Based Modeling (FBM), Industry Case Studies Program (ICSP), and International Workshop on Methods, Evaluation, Tools and Applications for the Creation and Consumption of Structured Data for the e-Society (Meta4eS), held as part of OTM 2018 in October 2018 in Valletta, Malta. As the three main conferences and the associated workshops all share the distributed aspects of modern computing systems, they experience the application pull created by the Internet and by the so-called Semantic Web, in particular developments of Big Data, increased importance of security issues, and the globalization of mobile-based technologies.

This book presents the proceedings of the virtual conference NeuroIS Retreat 2020, June 2-4, hosted in Austria, reporting on topics at the intersection of information systems (IS) research, neurophysiology and the brain sciences. Readers will discover the latest findings from top scholars in the field of NeuroIS, which offer detailed insights on the neurobiology underlying IS behavior, essential methods and tools and their applications for IS, as well as the application of neuroscience and neurophysiological theories to advance IS theory.

This book reports the best practices that companies established in Latin America are implementing in their manufacturing processes in order to generate high quality products and stay in the market. It lists the technologies, production and administrative philosophies that are being implemented, presenting a collection of successful cases of studies from Latin America. The book describes how the tools and techniques are being integrated, modified and combined to create new technical resources for assisting the decision making process for better economic performance in manufacturing companies. The efforts deployed for assisting the transformation of raw materials into products and services are described. The authors explain the main key success factors or drivers for success of each tool, technique or hybrid combination approach applied to solve manufacturing problems.

As the complexity of automotive vehicles increases this book presents operational and practical issues of automotive mechatronics. It is a comprehensive introduction to controlled automotive systems and provides detailed information of sensors for travel, angle, engine speed, vehicle speed, acceleration, pressure, temperature, flow, gas concentration etc. The measurement principles of the different sensor groups are explained and examples to show the measurement principles applied in different types.
