this book analyses how they pose an important challenge for entrepreneurs, managers and advisors involved in complex negotiations among firms. Providing an overview and discussion of existing literature, the author further develops a theoretical framework for analysing corporate negotiations, and illustrates how this can be implemented in real-life situations. This book presents an empirical case study from the automotive industry and analyses the negotiation between Fiat Chrysler in 2009, offering practical strategies for those involved in corporate negotiations. Presenting how win-win

Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain

competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.
