Recent cases of corporate failures, including the fixing of LIBOR rates and money laundering issues in the banking industry, highlight how behavioural issues on the part of company directors are significant contributory factors in corporate governance and the success or failure of companies. This book examines how personality and behavioural issues have contributed to major corporate failures, and how this risk may be managed. The book examines behavioural risks in corporate governance, and evaluates the extent to which risk management mechanisms have acknowledged various aspects of behaviour. Drawing from cases in the UK, the US and Australia and research in psychology and the behavioural sciences, Ngozi Vivian Okoye argues that current corporate governance

governance. Those boardroom and corporate cultures that are complacent about risk exposures and risk management or, worse, encourage 'chancers' and a 'what can we get away with' attitude, are examined in depth along with what is required to embed a culture of responsible risk-taking. Some 75 cases from around the world provide graphic examples and lessons to be learned. Although the text includes some summary practical guidance, this book is designed primarily as a thinking aid rather than a risk management cookbook. It is something to encourage better informed risk-decision making; a more informed view of enterprise risk exposures, control and mitigation issues and an awareness of boardroom and corporate culture issues and their impact on effective ERM.
