~~Process Orchestration | SAP Community~~

Process Orchestration provides a tool infrastructure to model and design business processes - from the overall process flow and the sequence of activities up to the interfaces and data types that are needed to integrate SAP systems and external systems. It combines the integration capabilities of SAP Process Integration Advanced Adapter Engine Extended (AEX) with the process modeling, operation, and monitoring capabilities of SAP Business Process Management (BPM).

The SAP NetWeaver Process Orchestration package combines the integration capabilities of the Advanced Adapter Engine Extended (AEX) with the process modeling, operation, and monitoring capabilities of SAP NetWeaver Business Process Management (BPM). Like AEX and SAP NetWeaver BPM, the Process Orchestration package is based on AS Java only. For BPM-related troubleshooting information, see the BPM Troubleshooting Guide .

Readmap illustrates the patterns in practice, and the book offers a look at emerging standards, as well as insights into what the future of enterprise integration might hold. This book provides a consistent vocabulary and visual notation framework to describe large-scale integration solutions across many technologies. It also explores in detail the advantages and limitations of asynchronous messaging architectures. The authors present practical advice on designing code that connects an application to a messaging system, and provide extensive information to help you determine when to send a message, how to route it to the proper destination, and how to monitor the health of a messaging system. If you want to know how to manage, monitor, and maintain a messaging system once it is in use, get this book.

The objective of this tutorial is to make you understand - what is SAP Process Integration? We will not go into the nitty-gritty of the subject but we will discuss the architecture and different features of SAP PI. We will cover the basic features only and will avoid discussing all features in this tutorial. Next there are a set of case studies which will give you an idea about the industry level utilization of SAP PI. Once you get more acquainted with the subject, you should try to solve them. The test cases are prepared in a manner so that it will take you down into the subject from simple to more complexes with each lesson and will give you an overall idea of the subject.

If you're looking for a comprehensive learning resource that will guide you in the development of interfaces using SAP NetWeaver PI, then you've come to the
