CSEC MATHEMATICS JANUARY 2020 PAPER 2 SECTION I 1. (a) Using a calculator, or otherwise, calculate the exact value of the following: (i) $4 \frac{2}{3} \times \frac{1}{2} - 1$ (SOLUTION:) $4 \frac{2}{3} \times \frac{1}{2} = \frac{14}{3} \times \frac{1}{2} = \frac{7}{3} = 2 \frac{1}{3}$ We first evaluate: $4 \frac{2}{3} \times \frac{1}{2} = 2 \frac{1}{3} = 2 \frac{2}{6} + \frac{2}{6} = 2 \frac{4}{6} = 2 \frac{2}{3}$ Now we have, $2 \frac{2}{3} - 1 = 1 \frac{2}{3} = 1 \frac{2}{3}$ (. Since $1 - 1 = 0$, we now have: $2 \frac{2}{3} - 1 = 1 \frac{2}{3} = 1 \frac{2}{3}$ =% 9< (in exact form ...

This book of ten multiple choice practice tests is designed especially for students preparing for the CXC General Proficiency examinations in Mathematics. All the questions are patterned along the lines of those used in the CXC examination and each test follows the format of the examination itself. The tests are clearly laid out to enable ease of use and marking.

This book provides worked solutions to the June 2002 to June 2008 Basic Proficiency Mathematics Examinations of the Caribbean Examinations Council. Although the Basic Proficiency has now been discontinued, the 'Basic' past papers remain a very fertile resource for students preparing for the CSEC Mathematics Exam at the end of Form 5. Students as early as Form 2 right up to Form 5 will find this book extremely useful. In addition to the solutions themselves, the step-by-step approach to solving exam problems is repeatedly demonstrated on a typical sized sheet on which most students will do their maths exams. It is to be noted however that this book will be totally useless if one attempts to use it as a replacement for the repetitious practice that must be undertaken in order to develop some level of competence in the subject matter of the CSEC Mathematics syllabus. Used as an aide to hard work and conscious effort, 'Basic Maths Solutions for CSEC' will be an invaluable tool as the platform of fundamentals is put into place, providing solid ground to move on to the more difficult aspects of the CSEC Mathematics syllabus.

This book offers the perfect two-year course for students revising for CSEC Mathematics. It provides coverage fo all CSEC topics and includes examination papers with answers for revision. Short-answer and objective-type tests at the end of each chapter aid students' revision.

This book covers all the topics in construction that is tested for CSEC Mathematics. The basic concepts are introduced first and students need to work through these with the use of their geometric instruments. After students have mastered these basic concepts, there are problems that need the applications of two or more of these concepts. Finally, there are structured problems where students apply all their knowledge that was learnt in construction, to work through.This book is designed for anyone who has never done construction before. No previous knowledge was assumed, so forms 1, 2 and 3 students will benefit from this book. Repeater students will profit tremendously when they work through the contents of the book. Adults can also use the book if they want to develop new skills and knowledge. A tutor is not needed if someone wants to use the book independently. Teachers, who are giving crash courses, can use the book with their students and they will master this topic within a day or two depending on their level of attainment. I will advise students and Teachers to immediately do past paper questions on construction, as soon as they complete this book, because all the concepts will be fresh in their minds.

This book covers multiple choice questions based on the topics listed in the CSEC Mathematics syllabus. There are answers at the back of the last chapter to help those who use this book. Students are advised to check the answers after a test is completed. Attempts should be made to do over any wrong problem until the correct answer is found. This is when a student can ask someone for help. There are some questions throughout the book that students are required to write answers for. This was purposely done to reinforce basic mathematical concepts and help students to build memory.This book is designed for all form five students and all repeater students who are currently taking CSEC Mathematics examinations. Form four students who are keen on developing their multiple choice skills early, instead of waiting for the last term in form five, will benefit from the book. There are some schools where form three students are introduced to form four topics. This book will help them to develop skills early.A tutor is not needed if someone wants to use the book independently. Teachers, who are giving crash courses, can use the book with their students and they will be able to work through all the tests within a week. Anyone who uses this book will learn something and those who enjoy doing Mathematics will benefit enormously.
