Strange Rebels-1979 and the Birth of the 21st Century—

STRANGE REBELS is based on an interesting idea: that 1979 marked a turning point from a more left-leaning political culture in the world (marked by Communism, social democracy in Europe, and New Deal liberalism in the United States) to a more right-leaning system marked by market reforms, globalization and the rise of political religion (particularly in the Middle East).

In Strange Rebels:1979 and the Birth of the 21st Century (Basic Books, 2013), Caryl argues that these very different people from these very different places were brought together by one thing: a belief that the future would not be secular and socialist (as most of the old-line socialist and liberal establishment thought), but rather religious and capitalist. The Marxist project in all its forms, they said, had failed.

Few moments in history have seen as many seismic transformations as 1979. That single year marked the emergence of revolutionary Islam as a global political force, the beginning of market revolutions in China and Britain that would radically alter the international economy, and the first stirrings of the resistance movements in Eastern Europe and Afghanistan that ultimately led to the collapse of the Soviet Union. In Strange Rebels, veteran journalist Christian Caryl shows how the world we live in today and the problems that plague it began to take shape in this pivotal year. Weaving the story of each of these counterrevolutions into a brisk, gripping narrative, Strange Rebels is a groundbreaking account of how these upheavals marked a startling conservative challenge to communist and socialist systems around the globe, giving birth to our modern age in the process.

Few moments in history have seen as many seismic transformations as 1979. That single year marked the emergence of revolutionary Islam as a political force on the world stage, the beginning of market revolutions in China and Britain that would fuel globalization and radically alter the international economy, and the first stirrings of the resistance movements in Eastern Europe and Afghanistan that ultimately led to the collapse of the Soviet Union. More than any other year in the latter half of the twentieth century, 1979 heralded the economic, political, and religious realities that define the twenty-first. In Strange Rebels, veteran journalist Christian Caryl shows how the world we live in today -- and the problems that plague it -- began to take shape in this pivotal year. 1979, he explains, saw a series of counterrevolutions against the progressive consensus that had dominated the postwar era. The year's epic upheavals embodied a startling conservative challenge to communist and socialist systems around the globe, fundamentally transforming politics and economics worldwide. In China, 1979 marked the start of sweeping market-oriented reforms that have made the country the economic powerhouse it is today. 1979 was also the year that Pope John Paul II traveled to Poland, confronting communism in Eastern Europe by reigniting its people's suppressed Catholic faith. In Iran, meanwhile, an Islamic Revolution transformed the nation into a theocracy almost overnight, overthrowing the Shah's modernizing monarchy. Further west, Margaret Thatcher became prime minister of Britain, returning it to a purer form of free-market capitalism and opening the way for Ronald Reagan to do the same in the US. And in Afghanistan, a Soviet invasion fueled an Islamic holy war with global consequences; the Afghan mujahedin presaged the rise of al-Qaeda and served as a key factor -- along with John Paul's journey to Poland -- in the fall of communism. Weaving the story of each of these counterrevolutions into a brisk, gripping narrative, Strange Rebels is a groundbreaking account of how these far-flung events and disparate actors and movements gave birth to our modern age.

From Africa to Asia and Latin America, the era of climate wars has begun. Extreme weather is breeding banditry, humanitarian crisis, and state failure. In Tropic of Chaos, investigative journalist Christian Parenti travels along the front lines of this gathering catastrophe--the belt of economically and politically battered postcolonial nations and war zones girding the planet's midlatitudes. Here he finds failed states amid climatic disasters. But he also reveals the unsettling presence of Western military forces and explains how they see an opportunity in the crisis to prepare for open-ended global counterinsurgency. Parenti argues that this incipient "climate fascism"--a political hardening of wealthy states-- is bound to fail. The struggling states of the developing world cannot be allowed to collapse, as they will take other nations down as well. Instead, we must work to meet the challenge of climate-driven violence with a very different set of sustainable economic and development policies.

This core text is the first to provide a much-needed interdisciplinary approach to international studies. Emphasizing the interconnected nature of history, geography, anthropology, economics, and political science, International Studies details the methodologies and subject matter of each discipline then applies these discipline lenses to seven regions: Europe; East Asia and the Pacific; South and Central Asia; sub-Saharan Africa; the Middle East and North Africa; Latin America; and North America. This disciplinary and regional combination provides an indispensable, cohesive framework for understanding global issues. The fully updated fourth edition includes four new global issues chapters: The Refugee Crisis in Europe; The Syrian Civil War and the Rise of the Islamic State; Global Climate Change; and The Globalization of Modern Sports. .

By one of the most profoundly influential thinkers of our century, The Rebel is a classic essay on revolution. For Albert Camus, the urge to revolt is one of the "essential dimensions" of human nature, manifested in man's timeless Promethean struggle against the conditions of his existence, as well as the popular uprisings against established orders throughout history. And yet, with an eye toward the French Revolution and its regicides and deciders, he shows how inevitably the course of revolution leads to tyranny. As old regimes throughout the world collapse, The Rebel resonates as an ardent, eloquent, and supremely rational voice of conscience for our tumultuous times. Translated from the French by Anthony Bower.

Offers the true story of a former CIA operative who was recruited out of Iran while serving as a member of the secretive and feared Revolutionary Guards.

Now a classic, this is the fundamental text for those seeking a "Spiritual Understanding of Nature on the Basis of Goethe's Method of Training Observation and Thought." Working out of a detailed history of science, Lehrs reveals to the reader not only how science has been inescapably led to the illusions it holds today, but more importantly, how the reader may correct in himself these misconceptions brought into his world view through modern education.

A New York Times Notable Book of 2020 " [A] sweeping and authoritative history" (The New York Times Book Review). Black Wave is an unprecedented and ambitious examination of how the modern Middle East unraveled and why it started with the pivotal year of 1979. Kim Ghattas seamlessly weaves together history, geopolitics, and culture to deliver a gripping read of the largely unexplored story of the rivalry between Saudi Arabia and Iran, born from the sparks of the 1979 Iranian revolution and fueled by American policy. With vivid story-telling, extensive historical research and on-the-ground reporting, Ghattas dispels accepted truths about a region she calls home. She explores how Sunni Saudi Arabia and Shia Iran, once allies and twin pillars of US strategy in the region, became mortal enemies after 1979. She shows how they used and distorted religion in a competition that went well beyond geopolitics. Feeding intolerance, suppressing cultural expression, and encouraging sectarian violence from Egypt to Pakistan, the war for cultural supremacy led to Iran ' s fatwa against author Salman Rushdie, the assassination of countless intellectuals, the birth of groups like Hezbollah in Lebanon, the September 11th terrorist attacks, and the rise of ISIS. Ghattas introduces us to a riveting cast of characters whose lives were upended by the geopolitical drama over four decades: from the Pakistani television anchor who defied her country ' s dictator, to the Egyptian novelist thrown in jail for indecent writings all the way to the murder of journalist Jamal Khashoggi in the Saudi consulate in Istanbul in 2018. Black Wave is both an intimate and sweeping history of the region and will significantly alter perceptions of the Middle East.

Writer and critic Vivian Gornick ' s long-unavailable classic exploring how Left politics gave depth and meaning to American life " Before I knew that I was Jewish or a girl I knew that I was a member of the working class. " So begins Vivian Gornick ' s exploration of how the world of socialists, communists, and progressives in the 1940s and 1950s created a rich, diverse world where ordinary men and women felt their lives connected to a larger human project. Now back in print after its initial publication in 1977 and with a new introduction by the author, The Romance of American Communism is a landmark work of new journalism, profiling American Communist Party members and fellow travelers as they joined the Party, lived within its orbit, and left in disillusionment and disappointment as Stalin ' s crimes became public.
