Grab a copy today!

The I'm Sorry I Haven't A Clue team of Barry Cryer, Graeme Garden and Tim Brooke-Taylor, in the company of their esteemed chairman Humphrey Lyttelton, have been recording their BBC radio show around the UK for longer than any of them can remember ... that's about a week - or twenty minutes in the case of Barry Cryer. At each venue Humph would present a short history of the location, written by Iain Pattinson, to the mutual delight of the audience, the team and their delightful scorer Samantha (who somehow always found time for a rewarding poke around the area's backstreets). We are privileged to present, in gazetteer form, the very best of Humph's local histories from Radio 4's multi award-winning 'antidote to panel games'. As accurate as Wikipedia and as comprehensive as Reader's Digest, this unique guide tells you everything you never knew you wouldn't ever need to know about the background and inhabitants of Britain's most prominent towns and cities. The intelligent reader will waste no time in adding it to their collection. Bristol It was from Bristol in 1497 that John Cabot set off to find a new route to the Spice Islands by sailing north-west. He instead discovered a strange, hostile world which he named 'Newfoundland', until the natives explained that they actually called it 'Swansea'. Nottingham It's well documented in official records that the city's original name was 'Snottingham' or 'home of Snotts', but when the Normans came, they couldn't pronounce the initial letter 'S', so decreed the town be called 'Nottingham' or the 'home of Notts'. It's easy to understand why this change was resisted so fiercely by the people of Scunthorpe. Brighton A settlement is first recorded in Brighton as long as ago as 3000 BC, when Celtic Druids practised their ancient worship of oaks, mistletoe and virgins, and indeed, oaks and mistletoe are still plentiful in Brighton.

Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (July - December)

\*Includes pictures \*Includes theories and explanations regarding the structures \*Includes online resources for further reading "Ten years from now nobody will remember my critics, and a million people will come to see what we have done." - Semir Osmanagic There are hundreds of pyramid-shaped hills distributed in and around central Bosnia and Herzegovina, yet one in particular has achieved worldwide attention over the last decade. Found in the small town of Visoko, located about thirty kilometres northwest from Sarajevo, the hill is the tallest point in a landscape of tremendous historical importance for the country. The region has been occupied from prehistoric times. Rich in natural resources, the area was extensively quarried for metal ore and stone over many periods. In the medieval period (twelfth to fifteenth centuries CE), this area became the centre of the Kingdom of Bosnia. It was here that the first king of Bosnia, Tvrtko I, was crowned in 1377 CE. During this time the large hill became known as Visocica, and a fortress was constructed upon its summit. From 1463, the Ottomans controlled them, and under their rule, many towns were founded, including Visoka which experienced a surge of economic development and cultural activity and became one of the richest towns in Bosnia. The town was of key importance in Bosnia's modern history, serving as a stronghold for Bosniak forces during conflict in the 1990s. However, it is not for these reasons that the hill of Visocica is so well-known today. Instead, the focus of attention has been on the controversial claim that it is the largest and oldest man-made pyramid to be found, not only in Europe, but the world. Since 2005, the Bosnian-born American businessman and self-proclaimed archaeologist Semir Osmanagic has promoted a controversial narrative of how-and why-the hill exists. He maintains that Visocica is not a natural feature, but was made by an ancient Bosniak civilization during the last Ice Age, between ten and twelve thousand years ago. Its substructure is allegedly filled with an intricate network of passageways that connect it to other structures in the surrounding landscape built during the same time. If true, the scale of these "pyramids" would have required the largest construction works to have ever been performed in prehistory. But this theory has been fiercely criticized by archaeologists, geologists, pyramid experts, journalists, and countless other academics and non-academics. Many scientific specialists and laypersons have gone to Visoko to see the site with their own eyes, and reported that there is little evidence to suggest the validity of Semir's claims. Furthermore, some of the claims made of the pyramid are borderline science fiction, featuring everything from aliens to the mythical civilization of Atlantis. Through the use of popular and journalistic media, rather than academic channels, Mr. Osmanagic has garnered the attention of many hundreds of volunteers that come to Visoko each year. Conflicting accounts testify to what takes place. Is legitimate archaeology being carried out, or the creation of a money-making theme park for tourists? Can the Bosnian pyramid be considered genuine, or is this but one example of widespread and pseudoscientific "pyramid-mania" that occurs across the globe? Why do people believe in the fantastic stories woven around the Pyramid of the Sun, and why is the academic community so critical of this phenomenon? And who, exactly, is Semir Osmanagic, without whom this story would not exist? The Ancient Bosnian Pyramids: The History and Mystery Over the Controversial Pyramids in Bosnia and Herzegovina chronicles the theories and debates over the landmarks. Along with pictures of important people, places, and events, you will learn about the Bosnian pyramids like never before.
