Nutrition and Physical Activity" offers information on the health risks associated with eating an unhealthful diet. Students are challenged to consider the influences that affect their dietary choices, and learn ways to manage weight healthfully using MyPlate and other tools. In the Physical Activity chapter, the importance of daily physical activity is addressed, as well as how students can assess their own fitness. Students also learn to develop a personal fitness plan and ways that they can prevent sports injuries by using proper equipment. "Each print module contains the same front matter section, titled Your Health and Wellness. This content is relevant to the entire program. It teaches the 10 Health Skills that are the foundation of the Teen Health program.

Adolescence is a time when youth make decisions, both good and bad, that have consequences for the rest of their lives. Some of these decisions put them at risk of lifelong health problems, injury, or death. The Institute of Medicine held three public workshops between 2008 and 2009 to provide a venue for researchers, health care providers, and community leaders to discuss strategies to improve adolescent health.
