Practical Language Testing equips you with the skills, knowledge and principles necessary to understand and construct language tests. This intensely practical book gives guidelines on the design of assessments within the classroom, and provides the necessary tools to analyse and improve assessments, as well as deal with alignment to externally imposed standards. Testing is situated both within the classroom and within the larger social context, and readers are provided the knowledge necessary to make realistic and fair decisions about the use and implementation of tests. The book explains the normative role of large scale testing and provides alternatives that the reader can adapt to their own context. Taking as a starting point the most enduring insights to emerge from acclaimed researcher Arthur Applebee's scholarship, this volume brings together leading experts to fully examine his work for its explanatory power and its potential to shape current and future research agendas. Focused on the ways in which students learn, schools teach, and assessors evaluate the forms and uses of language needed to flourish and grow, Applebee's work reconceptualized how educators view language development and use in relation to schooling. Organized around three themes—Considering Curriculum as Conversation; Writing as a Tool for Learning; Talking it Out: Class Discussion and Literary Understanding—the 14 fascinating chapters in this book extend and challenge Applebee's insights.

Teaching Character and Virtue in Schools addresses the contemporary issues of quantification and measurement in educational settings. The authors draw on the research of the Jubilee Centre at the University of Birmingham in order to investigate the concern that the conventional wisdom, sound judgement and professional discretion of teachers is being diminished and control mistakenly given over to administrators, policymakers and inspectors which in turn is negatively effecting pupils' character development. The books calls for subject competence to be complemented by practical wisdom and good character in teaching staff. It posits that the constituent virtues of good character can be learned and taught, that education is an intrinsically moral enterprise and that character education should be intentional, organised and reflective. The book draws on the Jubilee Centre's expertise in support of its claims and successfully integrates the fields of educational studies, psychology, sociology, philosophy and theology in its examination of contemporary educational practices and their wider effect on society as a whole. It offers sample lessons as well as a framework for character education in schools. The book encourages the view that character education is about helping students grasp what is ethically important and how to act for the right reasons so that they can become more autonomous and reflective individuals within the framework of a democratic society. Particularly interested readers will be educational leaders, teachers, those undertaking research in the field of education as well as policy analysts with a keen interest in developing the character and good sense of learners today.

Offers a discussion of the basic concerns which underlie the development and use of language tests.
