Many Americans believe that people who lack health insurance somehow get the care they really need. Care Without Coverage examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital-based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million -- one in seven--working-age Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.

Kenny Felderstein truly believes "Happiness Is The Forgotten Ingredient" in life. He is dedicated to assisting the reader of this book in taking charge of their career and their life and finding the happiness they deserve. He is not a doctor or therapist. The information he gives the reader comes from many years of executive management in business and personal life experiences - not just from books. He has come from meager roots to achieve Vice President and President level positions in both small and very large corporations. He has changed careers and taken demotions for the sole purpose of enhancing his happiness. He has made changes and taken risks for happiness, not for money, power or ego. He has overcome divorce, family tragedy, the loss of a son, near financial bankruptcy, never feeling good enough, never feeling he had control of his happiness and nonproductive anger and frustration. By overcoming these difficult times, Kenny has created a rewarding and happy life. Kenny Felderstein began blogging on the subject of Happiness because he realized he could reach a large multinational audience. He has a dedicated following in over nine countries. He has received feedback from his readers that his blogs have made a difference in their lives. This book is done in blog format. There are one hundred blogs - each standing on their own merits. All of his blogs are from personal experiences in his life. Some are funny. Some are serious. Some are emotional. However, all of them will help the readers realize that they have control of their happiness. Kenny Felderstein has published three successful books entitled "Never Buy a Hat if Your Feet Are Cold - Taking Charge of Your Career and Your Life," "The Year of My Death" and "A True Leader Has Presence - The Six Building Blocks To Presence." He lectures to and mentors people on the reasons people don't take charge of their careers and their happiness. Kenny Felderstein is a graduate of Saint Joseph's University in Pennsylvania and currently lives in Marina Del Rey, California with his beautiful wife Ellen.

The Patient Protection and Affordable Care Act (ACA) was designed to increase health insurance quality and affordability, lower the uninsured rate by expanding insurance coverage, and reduce the costs of healthcare overall. Along with sweeping change came sweeping criticisms and issues. This book explores the pros and cons of the Affordable Care Act, and explains who benefits from the ACA. Readers will learn how the economy is affected by the ACA, and the impact of the ACA rollout.

New York Times Bestseller • Notable Book of the Year • Editors' Choice Selection One of Bill Gates' "Amazing Books" of the Year One of Publishers Weekly's 10 Best Books of the Year Longlisted for the National Book Award for Nonfiction An NPR Best Book of the Year Winner of the Hillman Prize for Nonfiction Gold Winner • California Book Award (Nonfiction) Finalist • Los Angeles Times Book Prize (History) Finalist • Brooklyn Public Library Literary Prize This "powerful and disturbing history" exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's The Color of Law offers "the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation" (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, "virtually indispensable" study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), The Color of Law forces us to face the obligation to remedy our unconstitutional past.

Excerpt from The Versatility of an Insurance Career These words of Goethe form the kernel of what I propose to submit for your indulgent consideration to-night. When you did me the honour to invite my appearance before your Society, and when it was intimated that there would be no restrictions in the selection of a subject, I felt it would perhaps be not altogether uninteresting to you, and certainly a benefit to myself, if I were to attempt a survey of the manifold, the kaleidoscopic, variety of interests, which are bound up with the life and work of an underwriter, and the study of which must be both enjoyable and instructive to every aspirant to insurance honours.
