The "World - Toffees, Caramels and Similar Sweets - Market Analysis, Forecast, Size, Trends and Insights" report has been added to ResearchAndMarkets.com's offering.. The report provides an in-depth analysis of supply and demand for toffees, caramels and similar sweets on the global market. It will help you to find actionable insights and make data-driven decisions for growing your business.

The Future Agenda programme is the world's largest global open foresight programme and is based on the idea that by engaging with others from different cultures, disciplines and industries we can collectively create a more informed understanding of the world in which we live. This makes it easier to shape a strategy that will help to address the major challenges we face. Our aim is to identify ways in which systems could function, consumers behave and governments regulate over the next decade and give all organisations, large or small, access to insights that we hope, will help them to develop their future strategy. Building on expert perspectives that addressed everything from the future of health to the future of money, over 1500 organizations debated the big issues and emerging challenges for the next decade. Excerpts of the report is also available online for free (open in a new tab).

What challenges does the future hold? In an increasingly interconnected - and increasingly uncertain - world, companies, institutions and governments across the world recognise the vital need to pose this question in order to protect the interests of humanity. Founded in 2009, the Future Agenda explores key issues facing society over the next decade through 120 workshops held in 45 locations around the world, making it the largest open forum of its kind. The Future Agenda: Six Challenges for the Next Decade contains findings from the second Future Agenda initiative, featuring experts from a vast spectrum of industries. With essays falling under the themes of People, Place, Power, Belief, Behaviour and Business, this book is essential reading for all concerned by our collective well-being.

Future Agenda is a unique multi-disciplinary resource that brings together some of the best minds from around the globe to address the great challenges of the next decade. It maps out the major issues, identifies and debates potential solutions and suggests the best ways forward. Future Agenda provides a platform for collective innovation at

"Global Trends 2025: A Transformed World" is the fourth unclassified report prepared by the National Intelligence Council (NIC) in recent years that takes a long-term view of the future. It offers a fresh look at how key global trends might develop over the next 15 years to influence world events. Our report is not meant to be an exercise in prediction or crystal ball-gazing. Mindful that there are many possible "futures," we offer a range of possibilities and potential discontinuities, as a way of opening our minds to developments we might otherwise miss. (From the NIC website)

Our intuition on how the world works could well be wrong. We are surprised when new competitors burst on the scene, or businesses protected by large and deep moats find their defenses easily breached, or vast new markets are conjured from nothing. Trend lines resemble saw-tooth mountain ridges. The world not only feels different. The data tell us it is different. Based on years of research by the directors of the McKinsey Global Institute, No Ordinary Disruption: The Four Forces Breaking all the Trends is a timely and important analysis of how we need to reset our intuition as a result of four forces colliding and transforming the global economy: the rise of emerging markets, the accelerating impact of technology on the natural forces of market competition, an aging world population, and accelerating flows of trade, capital and people. Our intuitions formed during a uniquely benign period for the world economy—often termed the Great Moderation. Asset prices were rising, cost of capital was falling, labour and resources were abundant, and generation after generation was growing up more prosperous than their parents. But the Great Moderation has gone. The cost of capital may rise. The price of everything from grain to steel may become more volatile. The world's labor force could shrink. Individuals, particularly those with low job skills, are at risk of growing up poorer than their parents. What sets No Ordinary Disruption apart is depth of analysis combined with lively writing informed by surprising, memorable insights that enable us to quickly grasp the disruptive forces at work. For evidence of the shift to emerging markets, consider the startling fact that, by 2025, a single regional city in China—Tianjin—will have a GDP equal to that of the Sweden, of that, in the decades ahead, half of the world's economic growth will come from 440 cities including Kumasi in

Ghana or Santa Carina in Brazil that most executives today would be hard-pressed to locate on a map. What we are now seeing is no ordinary disruption but the new facts of business life— facts that require executives and leaders at all levels to reset their operating assumptions and management intuition.

Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

It is hard for the US to ignore China these days with daily stories of product recalls which show that the vast preponderance of products sold in America are actually made in China. Add to that the fact that China is leaping forward in scientific and technology research and is fuelled by a boom economy. This new book presents analyses of relevant to China-US economic and geopolitical relations.

Identify the best technology investments and implement them rapidly Accelerating Innovation and Invention in the 21st Century Enterprise: How Top CIOs Leverage Technology to Achieve Superior Results gives CIOs an essential playbook for learning how to implement and sustain innovation and invention. Drawing on the experiences of many of the world's leading CIOs, the book reveals the strategies and techniques they used to put in place the newest techniques and technologies. Since the rise of the digital economy, the role of the CIO has expanded the responsibilities of the IT team function. The new norm is continuous innovation; CIOs must deliver or perish. This book offers a guide for selecting and implementing the right technology that is so essential for success in the hyper-competitive marketplace. This vital resource offers a guide to tech investments including: • Artificial Intelligence and advanced cyber security • Robotics and advanced networks including Mesh, Edge and Hybrid Cloud • Virtual Reality and smart cities • Autonomous transportation, logistics and rapid prototyping, and digital twin Accelerating Innovation and Invention in the 21st Century Enterprise is written to help identify the best technology investments and move forward with rapid implementations of new tech and stay ahead of the competition.

If you only read one book on the future of work, Work Disrupted: Opportunity, Resilience, and Growth in the Accelerated Future of Work should be that book. The future of work swept in sooner than expected, accelerated by Covid-19, creating an urgent need for new maps, new mindsets, new strategies-- and most importantly, a trusted guide to take us on this journey. That guide is Jeff Schwartz. A founding partner of Deloitte Consulting's Future of Work practice, Schwartz brings clarity, humor, wisdom, and practical advice to the future of work, a topic surrounded by misinformation, fear, and confusion. With a fundamental belief in the power of human innovation and creativity, Schwartz presents the key issues, critical choices, and potential pitfalls that must be on everyone's radar. If you're anxious about robots taking away your job in the future, you will take comfort in the realistic perspective, fact-based insights, and practical steps Schwartz offers. If you're not sure where to even begin to prepare, follow his level-headed advice and easy-to-follow action plans. If you're a business leader caught between keeping up, while also being thoughtful about the next moves, you will appreciate the playbook directed at you. If you're wondering how Covid-19 will change how and where you will work, Work Disrupted has you covered. Written in a conversational style by Schwartz, with Suzanne Riss, an award-winning journalist and book author, Work Disrupted offers a welcome alternative to books on the topic that lack a broad perspective or dwell on the problems rather than offer solutions. Timely and insightful, the book includes the impact of Covid-19 on our present and future work. Interviews with leading thinkers on the future of work offer additional perspectives and guidance. Cartoons created for the book by leading business illustrator Tom Fishburne bring to life the reader's journey and the complex issues surrounding the topic. Told from the perspective of an economist, management advisor, and social commentator, Work Disrupted offers hope--and practical advice--exploring such topics as: How we frame what lies ahead is a critical navigational tool. Discover the signposts that can serve as practical guides for individuals who have families to support, mortgages to pay, and want to stay gainfully employed no matter what the future holds. The importance of recognizing the rapidly evolving opportunities in front of us. Learn how to build resilience—in careers, organizations, and leaders—for what lies ahead. Why exploring new mental models helps us discover the steps we need to take to thrive. Individuals can decide how to protect their livelihood while businesses and public institutions can consider how they can lead and support workforces to thrive in twenty-first-century careers and work. "Jeff's marvelous book is a roadmap for the new world of work with clear signposts. His insights will help readers discover opportunities, take action, and find hope in uncertain times. The ideas are fresh, beautifully crafted, and immediately applicable. This is not only a book to be read, but savored and used." --Dave Ulrich, Rensis Likert Professor, Ross School of Business, University of Michigan; Partner, the RBL Group; Co-author Reinventing the Organization
