of the art and the science of physiotherapy. It plays a vital role in the rehabilitation of the physically handicapped.

There are a large number of books on orthopaedics and physiotherapy, but they all deal with these subjects as a separate entity. There is not even a single book that provides the overall picture of the total therapeutic management. This book, the first of its kind, fills the gap. About the Author : -

Read the New York Times bestseller that has taken the world by storm In this "charming debut" (People) from one of Sweden's most successful authors, a grumpy yet loveable man finds his solitary world turned on its head when a boisterous young family moves in next door. Meet Ove. He's a curmudgeon--the kind of man who points at people he dislikes as if they were burglars caught outside his bedroom window. He has staunch principles, strict routines, and a short fuse. People call him "the bitter neighbor from hell." But

must Ove be bitter just because he doesn't walk around with a smile plastered to his face all the time? Behind the cranky exterior there is a story and a sadness. So when one November morning a chatty young couple with two chatty young daughters move in next door and accidentally flatten Ove's mailbox, it is the lead-in to a comical and heartwarming tale of unkempt cats, unexpected friendship, and the ancient art of backing up a U-Haul. All of which will change one cranky old man and a local residents' association to their very foundations. A feel-good story in the

Edition of The Unlikely Pilgrimage of Harold Fry and Major Pettigrew's Last Stand, Fredrik Backman's novel about the angry old man next door is a thoughtful exploration of the profound impact one life has on countless others. "If there was an award for 'Most Charming Book of the Year,' this first novel by a Swedish blogger-turned-overnight-sensation would win hands down" (Booklist, starred review).

Beginning of Turkish rule. Through the example of the city of Isfahan, the book analyses the internal evolution of Iranian society in this period and the interaction of the Iranian elites and Turkish rulers. Drawing on an analysis of a wide range of sources, including poetic and epistolary material, this study fills an historiographical gap and casts new light on the two centuries prior to the Mongol invasion. This comprehensive analytical study provides a new contribution to the understanding of many crucial issues: the cultural

divide between Western and Eastern Iran; the military potential of city-dwellers; the attitude of the Turkish rulers toward cities and city life; the action of the famous vizier Nizam al-Mulk; the meaning of the Ismaili uprising; and above all the structure of the local elite, organized into rival networks and largely autonomous vis-à-vis state powers. The study is enhanced by a variety of additional features, including extensive genealogical tables, Arabic script and maps. Providing a new understanding of the cultural identity of Iran, this book is an important

Research can seem difficult to get to grips with. However, at the heart of this new edition is the view that research is essentially a simple activity, the principles of which can be readily understood by students new to the subject. Each chapter guides the reader to uncover the 'mysteries' of research, exposing each aspect in turn, while demonstrating how research in healthcare is a practical activity, orientated directly to patient care.
