Tourism as a global industry is essentially a post Second-World War phenomenon. Though a number of research papers and articles have been written on different aspects of tourism, there has been a need for an authentic, comprehensive reference book on tourism. Tourism is an ever-expanding service oriented industry with high growth potential for national as well as for international community. Today, tourism has become a global as well as national level exhibition and description of places, prosperity, higher standards of living and the fast-growing concept of paid holidays. The process of tourism incorporates man, space and time as its principal components. As such, it has far reaching significance and implications of a socio-economic nature alongside the environment ones. The tourism has emerged as a most instrumental phenomenon in the economic and social development of any society. The main objective of the present book of Tourism is to organize and put together the different aspects of this complex matrix of the multiple interrelated dimensions of the tourism.
