Profiles the life of the primatologist who was the first scientist to study wild chimpanzees in their natural environment.

A biography on the life, career, and views of one of today's best-known scientists traces Goodall's path from an early fascination with animals to her landmark, but controversial, studies of chimps in the wild and conservation efforts.

"Who is Jane Goodall? A scientist. An animal rights activist. A conservationist. From the creators of the #1 New York Times best-selling Who Was? series comes this engaging empowering board book biography for the youngest animal lovers."--

The well-known English zoologist describes her early interest in animals and how this led to her study of chimpanzees at the Gombe Stream Reserve in Tanzania.

We can all be heroes. That's the inspiring message of this New York Times bestselling picture book

biography series from historian and author Brad Meltzer. Learn all about Jane Goodall, the chimpanzee scientist. Each picture book in this series is a biography of a significant historical figure, told in a simple, conversational, vivacious way, and always focusing on a character trait that makes the person a role model for kids. The heroes are depicted as children throughout, telling their life stories in first-person present tense, which keeps the books playful and accessible to young children. And each book ends with a line of encouragement, a direct quote, photos, a timeline, and a source list. This tenth book in the series features Jane Goodall, the scientist and conservationist who is famous for her work with chimpanzees.

From New York Times bestselling author and world-renowned scientist Jane Goodall, as seen in the National Geographic documentary *Jane*, comes a fascinating examination of the critical role that trees and plants play in our world. *Seeds of Hope* takes us from Goodall's home in England to her home-away-from-home in Africa, deep inside the Gombe forest, where she and the chimpanzees are enchanted by the fig and plum trees they encounter. She introduces us to botanists around the world, as well as places where hope for plants can be found, such as The Millennium Seed Bank. She shows us the secret world of plants with all their mysteries and potential for healing our bodies as well as Planet Earth. Looking at the world as an adventurer, scientist, and devotee of sustainable foods and gardening--and setting forth simple goals we can all take to protect the plants around us--Goodall delivers an enlightening story of the wonders we can find in our own backyards.

A great deal has happened since the publication of *Jane Goodall: 40 Years at Gombe* in 1999. Most recently, endeavors at the Gombe field site have included landmark research related to AIDS progression; establishing programs to improve sanitation, health care, and education in neighboring Tanzanian communities; and partnering with local people to pursue reforestation initiatives. The accomplishments of the past 10 years alone have given the Jane Goodall Institute a great deal to celebrate. In honor of the field site's 50th anniversary, STC is proud to release *Jane Goodall: 50 Years at Gombe*, a compelling pictorial tribute to Dr. Goodall's life, her studies of chimpanzee behavior, and her unflagging efforts to motivate people to make this world a better place. With a new format, a modern design, more than a dozen new photographs, and updated text throughout, this revised edition retraces five decades of compassion and discovery.

"This biography for children will trace Goodall's life, but each chapter will also focus on two or more the chimpanzees that she observed, with information in sidebars about these particular animals. Along with biographical details, the book will explore the ethical issues that surround Goodall's work and show what has changed in our understanding of Great Apes. What do we know today about these animals in terms of language, speech, tool use, and DNA? How has sophisticated technology - GPS systems, Satellite imagery, portable digital microphones - been used to gain new information about animal populations."--
